

Conversion from a Legacy System to the CHS Primary Care Solution

The GP IT Service Provider (In Practice Systems Limited, trading as “CHS”) effects the transfer of data from your Legacy System to the CHS Primary Care Solution (the Conversion)

CHS use reasonable endeavours to complete the Conversion prior to the Managed Service Go-Live date.

CHS shall comply at all times with the Data Processing Agreement (overleaf) and with clause 29 of the Call Off Contract. The Practice acknowledges that limitations in the technology available for the electronic transfer of data from the third party programs to the CHS Primary Care Solution make it necessary that the Practice participate in checking the data recorded on the third party programs and for verifying and confirming that the Conversion of the data is successful.

The Practice shall, on the Managed Services Go-Live date, sign an acknowledgement confirming receipt of the converted data and they shall have ninety days from that date to notify CHS of any errors.
