Hints and Tips for Finding Drugs and Appliances

Using the Select Drug screen

Formulary - Tick to display formulary items only. These display with an 'f' to the left of the item name when in formulary mode.

Discontinued - Tick to display discontinued items in the list. These display with a 'd' to the left of the item name.

All Generics - Tick to display branded generics and parallel imports in the list. Generic items display with a 'g' to the left of the item name, parallel imports display with a 'p' to the left of the item name.

Special - Tick to display special preparation items in the list. These display with an 's' to the left of the item name.

Select to switch between prescribing mode (default), and maintain formulary mode

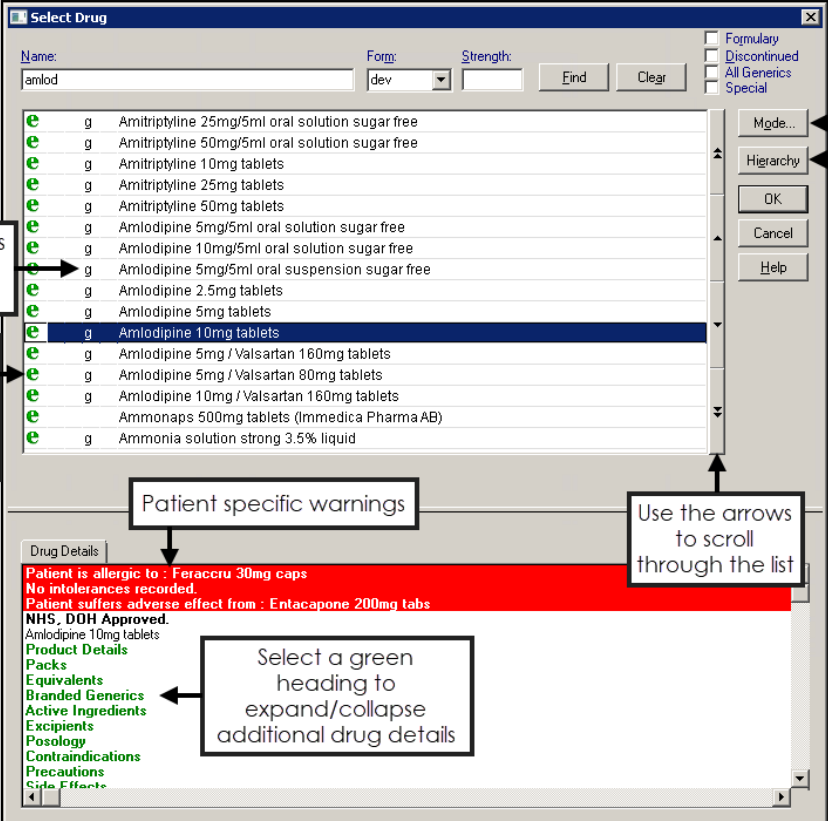

Select to display the drug dictionary by drug class not alphabetical list, if you have an item selected, the relevant drug class displays

Indicates this item is a generic

Indicates this item can be issued electronically

Use the arrows to scroll through the list

Select a green heading to expand/collapse additional drug details

Training Tip - Zoom to enlarge or decrease the drug list text size by selecting **Ctrl + mouse scroll**. The text returns to the default size next time you view the list.

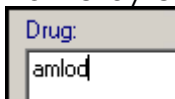

Hints and Tips on Finding Drugs and Appliances

These are the most common ways to find drugs and appliances.

From the **Therapy – Add** screen, enter any of the following in **Drug**:

- **Drug Name** - Select a drug name by entering the first part of the

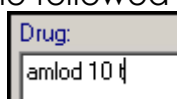

name, for example, **amlod**

A screenshot of a software input field labeled 'Drug:'. The field contains the text 'amlod'.

- **Drug Name, Strength and Form** - Select a drug by entering the first part of the drug name followed by part of the strength and form, for

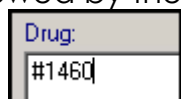

example, **amlod 10 t**

A screenshot of a software input field labeled 'Drug:'. The field contains the text 'amlod 10 t'.

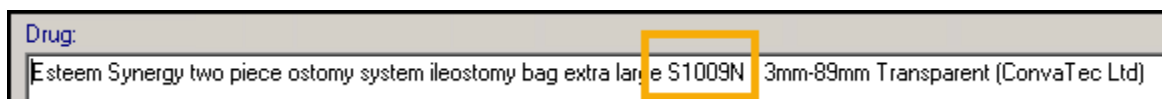

- **Appliances** - These include items such as colostomy bags, other stoma aids and bandages. Appliances can be difficult to find by name:
 - If you know the appliance Reference Number, you can enter # followed by the appliance Reference Number, for example,

#1460

A screenshot of a software input field labeled 'Drug:'. The field contains the text '#1460'.

- If there is a number in the product name, you can enter % followed by the number in the name, for example, **%s100** returns:

A screenshot of a software input field labeled 'Drug:'. The field contains the text 'Esteem Synergy two piece ostomy system ileostomy bag extra large S1009N 3mm-89mm Transparent (ConvaTec Ltd)'. The reference number 'S1009N' is highlighted with a yellow box.

Remember – You can select the **<F1>** key from any screen within **Vision 3** to access the on-screen help.
