Cegedim Healthcare Solutions Flash Card

Where there are multiple drug defaults, how are they applied?

When you prescribe an item, the dosage and quantity defaults, that automatically complete, depend on how you select the item. **Vision 3** uses a priority order as follows:

💡 **Training Tip** - Gemscript defaults are only offered if **Use Gemscript Posology Defaults** is ticked in the user's setup options, see Consultation Manager Setup - Therapy in the **Consultation Manager Help Centre** for details.
