
SNOMED CT Changes and New Vision Local Codes October 2019

Introduction

This is the change report for the October 2019 SNOMED CT dictionary.

As you may be aware, Vision 3 dual codes all data, data is entered using Read codes and mapped to SNOMED CT behind the scenes. From April 2018 there are additions to SNOMED CT that cannot be directly mapped to existing Read codes. These can be recorded in Vision Anywhere, which is fully SNOMED CT compliant.

See [SNOMED CT In Vision FAQs for further information](#).

This change report provides the link to the SNOMED CT update information and lists the Vision local codes we are introducing to ensure you can utilise the new SNOMED CT codes that cannot be directly mapped to Read codes within Vision 3.

SNOMED CT Changes - October 2019

For full details of the latest SNOMED CT code release, please refer to <https://digital.nhs.uk/services/terminology-and-classifications/snomed-ct> and select **NHS Digital SNOMED CT Browser**.

 **Training Tip** - For further information about SNOMED CT, see <https://www.snomed.org/snomed-ct>.

The SNOMED CT codes listed below do not map to existing Read codes. Vision have therefore created and will shortly be releasing **Vision Local Codes**, based on the Read code format, to enable you to both record and report on these new codes within Vision 3:
