

# Vision 3 Release DLM 860

## **Summary of Changes**

Vision 3 release DLM 860 contains the following features and improvements:

Note - This Vision 3 DLM 860 release may enable new and/or updated content in other Cegedim Healthcare Solutions applications that you are using. Please remember to check the What's New or Release Guide for any other applications you use, see <u>https://help.cegedim-healthcare.co.uk/Cegedim Primary Care Solutions/Content/Ho</u> me.htm for easy access to all our Help Centres.

### All Countries

#### **Consultation Manager**

 Age-related Prescribing Precautions - When prescribing for patients under one month old, age-related prescribing precautions do not display. To remind you to check for precautions elsewhere a new message displays in the comments section of the Drug Check Results screen mirroring the warning that displays in the top half:

- Immunisations:
  - SmallPox The existing clinical term for the stage one Smallpox vaccination is updated to Local code 6590.00 Administration of first dose of smallpox vaccine.
  - **Covid** All age, predefined interval and **Next Stage** values are removed for all Covid vaccinations at all stages.

#### **Consultation Manager**

Organisations - The issue where the preferred pharmacy was not printing on the prescription if any part of the pharmacy name was over 13 characters is now resolved. Please note, an address for the pharmacy, including a Town, must be set up in Control Panel - File Maintenance - Organisation for the preferred pharmacy to print on the prescription.

### **England, Wales and Northern Ireland**

#### **Consultation Manager**

• Creating an Acute prescription from a Repeat - The Floating Drop Target is updated to recognise the type of prescription issue you are

dropping on to **Prescription** *Line*. You can now drag and drop the following:

- **Repeat issue**, to create a one off acute prescription retaining the same details as the repeat issue you are copying, or
- Acute issue, to create a repeat master retaining the same details as the repeat issue you are copying:

## **England and Wales**

**Primary Care Registration Management (PCRM)** aspects of **Vision 3** are updated for England and Wales. This has the following impact:

#### Registration

• **GP Notes** - When you register a new patient, the **GP Notes** section now has a list to select from, or you can enter free text:

Registration - Ger	neral l
Pre-Registration detail	Acceptance type - TRANSFER-IN
GP Notes:	PROOF OF IDENTIFICATION / ADDRESS SEEN
or enter free text:	PROOF OF IDENTIFICATION / ADDRESS SEEN

#### **Control Panel**

- **Residential Institutes (RI)** The **Identifier Value** for all RIs must now be updated to:
  - **V0** for Nursing/Residential Care Homes.
  - YO for Students.

This change must be done manually at your earliest convenience.

To make the change:

1. From **Control Panel**, select **File Maintenance** - **Organisation** and highlight one of your RIs.

- 2. Select Edit
- 3. Select the **Identifiers** tab.
- 4. Update the **Identifier Value** to either **V0** or **Y0** depending on the RI type.
- 5. Select **OK** to save.

## **England Only**

• Clinical Practice Research Datalink (CPRD) - Where a patient has chosen to not share their confidential information for research and planning purposes via the National Data Opt-out Service, their data is no longer included in a CRPD data collection.

See <u>National Data Opt-out Service</u> in the **Search and Reports** Help Centre for further details.

### **Scotland Only**

#### **Consultation Manager**

• Chronic Medication Service (CMS) Therapy Reorder form - When you issue a CMS prescription, the Reorder form now prints by default.

**Training Tip** - To stop this from printing, in **Prescription Manager** you must remember to remove the tick from **Print Reorder Form**, see <u>Prescription Manager Functions</u> in the **Consultation Manager Help Centre** for details.

- Instalment Prescribing You can now print a Medication Schedule for a patient on an instalment plan.
  - 1. From **Consultation Manager**, with the patient selected, press **F9** on your keyboard and **Prescription Manager** displays:

Prescription Manager - Add			🔂 Erint 🛛 📴 Be-Print 🖻	K Cancel D Set	up X	Close	🧏 Help

**Training Tip** - The **Medication Schedule** print out can be multiple pages long.

### Northern Ireland only

#### **Control Panel**

• Exchange Web Services - This release updates Exchange Web Services in Northern Ireland to prevent messaging issues. This adds all available pathology providers and the out of hours service within Northern Ireland as new trading partners.
