

Accuracy Check Label Settings

When using the **Accuracy Check** module, a QR code will print on your item and bag labels, as well as the new picking list. You may need to adjust the standard position of the QR codes if you use pre-printed labels.

You can adjust the position of the QR codes from the **Pharmacy Details** - **Accuracy Check**.

Set your QR Code Positions

1. From the Pharmacy Manager Toolbar, select Tools - System Settings -Pharmacy Details - Accuracy Check to display the Accuracy Check settings screen.

Pharmacy [Details								×
Pharmacy	Licence	Dispensing	Charging	Checking	Products	Ordering	Product R	ules	Events

						Close	Cancel	l	Apply

2. Label & QR Settings displays the current QR code positions for the picking list, item and bag labels. From here you can adjust the top and left margins to adjust the position of the code by pixels.

Please note a value of 0 for both the top and left margin defaults the QR code to the following position.

Label	Default Position of QR code when set to 0,0
Picking List	Top right
Bag	Top right
ltem	Top left

Adjusting the left margin value from 0 to 10 moves the QR code to the right by 10 pixels, or adjusting the top margin from 0 to 10 moves the QR code down by 10 pixels. Alternatively, negative numbers move the QR code in the opposite direction, to the left or up.

3. Select **Print Test Label** Print Test Label to print a test label for each label to check your settings.

Check your Item Labels

Due to the addition of the QR codes and using the Windows Printer Driver to print your labels, you may need to adjust your label printer configuration.

The label top margin is the gap between the top of the label and the start of the text. This needs to be changed if your text is disappearing off the top of the label or the label is pre-printed at the top and your text needs moving down.

- 1. From the **Pharmacy Manager Toolbar**, select **Tools System Settings Printer Configuration Pharmacy Manager**.
- 2. Select the **Workstations** tab, highlight the **Label Printer** and then select **Test** to print a test item label.

		Workstation Printing 💐
	Workstation name: LVDL	Browse
L K - la K - la A	Print Job	Destination Printer
	1 Label Printer	MICROSOFT
Label Frinter	2 Leaflet Printer	MICROSOFT PRINT TO PDF (local printer)
	3 Endorsement Printer	MICROSOFT PRINT TO PDF (local printer)
	4 MAR Printer	MICROSOFT PRINT TO PDF (local printer)
	5 Cassette Printer	MICROSOFT PRINT TO PDF (local printer)
	6 Form Printer	MICROSOFT PRINT TO PDF (local printer)
	7 Prescription Printer	Not installed
	<	Status Details Assign Remove

3. Should you need to adjust the settings, with the label printer still highlighted, select **Details** to open the **Printer Details** screen.

Apply

4. The **Printer Details** screen displays.

	🚳 Printer Details - MICROSOFT X				
	Details				
			Printer Details 🝏		
	Printer name:	MICROSOFT

	Left margin: → Iop margin: <u>W</u> idth: <u>H</u> eight: <u>P</u> resentation feeds: <u>R</u> etraction feeds:	2	Standard v		
Top margin		0	 Print child warning text Text will be at top of label 		
		40	Text will be at bottom of label		
		12	Print order replies in warning section		
		0	 Print pharmacy address on label Address will be at top of label 		
		0	Address will be at bottom of label		
	Additional Top Line Item None Pip code Prosper code Link code PP Item Reference		 Print order replies in address section Leave extra line blank for large labels Leave extra line blank for separator Print cost price on label Print max daily usage on label Inverse Drug Name on label Print top of label first Use alternative bag label format Use alternate code to print £ 		

To change the top margin, **Print using Windows printer driver** must be unticked.

- 5. Edit **Top margin** as required. As an example, adjusting the value 0 to 1 adds a margin of 1 line of text.
- 6. Tick **Print using Windows printer driver** and then select **Apply** and **Close**

Important - No additional label formatting is possible with **Accuracy Check** enabled, therefore the label defaults to the **Pharmacy Manager** standard.

7. From the **Printer Configuration** screen, select **Test** to print another test label to check the settings and repeat as required.

Example Labels

The label examples below have used blank labels and the following settings:

Pharmacy Details - Accuracy Check

Picking List Label

- Left Margin: 0
- Top Margin: 0

Bag Label

- Left Margin: 0
- Top Margin: 0

Item Label

- Left Margin: 0
- Top Margin: 0
- Blank lines between Product and Directions: 1

Printer Details

- Print using Windows printer driver: Ticked
- Top margin: 1
