Stage 3	16
Discharge Medicines Service (DMS) Report	

Complete a Discharge Medicine Service (DMS)

To complete a Discharge Medicine Service (DMS) within **Pharmacy Manager**, you must complete the following three stages:

- **Stage 1** Compare the medicines that the patient was discharged from hospital with to those they were taking before admission, make a DMS note in the patient record and record an intervention. See **Stage 1** on page **5**.
- **Stage 2** Dispense the patient's first prescription after their discharge and record an intervention. See **Stage 2** on page **14**.
- **Stage 3** Discuss with the patient, and/or their carer, their understanding of the medicines they are taking and record an intervention. See **Stage 3** on page **16**.

After completing all three stages, run a DMS report within **Pharmacy Manager** and retain it as proof that all three stages of the DMS are completed. See **Discharge Medicines Service (DMS) Report** on page **17** for details.

Stage 1

In Stage 1 of the DMS, the electronic referral is received by the pharmacy and the following actions must be completed within **Pharmacy Manager**:

- Compare the medication the patient has been discharged on to the medication taken at admission, see Comparing the Patient's Medication on page 5 for details.
- Make a note within their patient record, to ensure that all staff are aware that Stage 2 and Stage 3 of the DMS must be completed, see **Recording a Note on the Patient's Record** on page **7** for details.
- Record Stage 1 of the DMS as an intervention in Pharmacy Manager, see Recording an Intervention on page 9 for details.

Comparing the Patient's Medication

After the hospital has sent the electronic referral to the pharmacy, you must compare the medication the patient is discharged on to those they were taking before admission to hospital.

This helps discover any interactions and/or sensitivities in **Pharmacy Manager** caused by the patient's new medication.

To compare the patient's medication:

1. From the **Pharmacy Manager Toolbar**, select **Quick Actions – Quick** Interaction Check:

🖶 Pharr	macy Manage	er				
	File	Tools	Help	:=	Quick Actions	
				Hist	tory	Ctrl+Q
				Han	ndout To Patient	
				Ente	er A Barcode	Ctrl+#
				Quid	ck Interaction Chec	k
				Star	rt MUR	Ctrl+Alt+M
				Add	I New Product	Ctrl+F3
				Bac	kup	
				Mes	ssage Dynamics	

2. The Quick Interaction Check screen displays. Select Check for patient

 <u>Check for patient:</u> 					
🖶 Quick Interaction Check					×
✓ <u>C</u> heck for patient: Mr Dave V	Villiams		<u>E</u> ind	<u>D</u> etails	Patient Intervention
Enter the list of drugs to check in	eractions/sensitivities (if	applica	ble) for:		
Product	Size	#	Last Dispensed	Qty	Dose
Applicable interactions and sensit	ivities are:				
No information on system.					
2 Interaction Intervention			<u>A</u> dd <u>R</u> e	move	E <u>x</u> plain Close

- 3. Search for and select the required patient.
- 4. Select Add Add and the Find Product screen displays.
- 5. Search for and select the medication that the patient was prescribed when discharged from hospital:

/* Find Product			×
Product:		<u>F</u> ind	Personal list only
Description	Code	Pack Si	In Sto Price Price
<			>
Tariff Price: £0.00		<u>D</u> et	ails <u>O</u> K Cancel

6. **Applicable interactions and sensitivities are:** displays any interactions/ sensitivities between the medication that the patient was prescribed when discharged from hospital, and those they were taking before admission to hospital:

🖶 Quick Interaction Check					×
✓ <u>C</u> heck for patient: Mr Dave Williams			<u> </u>	<u>D</u> etails	Patient Intervention
Enter the list of drugs to check interactions/se	nsitivities	(if applicat	ole) for:		
Product	Size	#	Last Dispensed	Qty	Dose
1 Enalapril 20mg Tablets	28				
Applicable interactions and sensitivities are:					
K There is a major interaction between Er	nalapril ar	nd Lithium (Carbonate Increased	Lithium lev	els and increased
2 Interaction Intervention			<u>A</u> dd <u>R</u> e	move	E <u>x</u> plain Close

7. To view the interaction in greater detail, select the interaction and select **Explain**.

Recording a Note on the Patient's Record

Record a note on the patient's record to inform staff that Stage 2 and Stage 3 of the DMS must be completed.

From the Patient Details screen:

1. From the **Pharmacy Manager Search bar** select the drop-down arrow and select **Patient**:

	Patient	Ŧ	Search for a patient	Q
	Patient			
6	Product		_	Patient Repeat Prescriptions

2. Search for the patient and select **Details** to open the **Patient Details** screen.

3. Select the **Other** tab. Within **Notes**, enter a note similar to 'Patient discharged from hospital 21.02.2021. Carry out DMS stage 2/3 when next prescription arrives':

👮 Patient Deta	ails - Mr Dave Will	iams									×
Patient	Doctor	Conditio	ons	Medica	tion	Histor	ry	Other	r	Suppressio	ns
Exempti	ions	Repeat R>	C	ePre	scriptio	n Update	s	Ν	lessage	Dynamics	
								Othe	r Det	ails 🗐	_
Other Me	edication Iten	ns	т		- Note	S

					CAR	RY OUT	DMS S RIPTI	STAGE 2 ON ARF	2/3 WHE RIVES	N	
U <u>s</u> ing	A	dd <u>P</u> roduct	Add F <u>r</u> e	e Text							
						Doloto			Canaal	Appl	
									Cancel	Appi	y

4. Select Apply

When you dispense the patient's next prescription, the below note displays:

👜 Advanced Patient Notes	×								
Advanced Notes for Mr Dave Williams									
Notes PATIENT DISCHARGED FROM HOSPITAL 21.02.2021 CARRY OUT DMS STAGE 2/3 WHEN NEXT PRESCRIPTION ARRIVES	Other Medication								
Other Conditions	Other Sensitivities								
Adverse Drug Reactions									
	<u>о</u> к								

Note - To ensure that the above notice displays, select Tools -User Settings - User Details - Dispensing. From Patient Notes, select Display Patient Notes Dialog.

Recording an Intervention

After comparing the patient's medication and recording the required note on their record, you must record this as an intervention.

To record an intervention:

1. From the **Pharmacy Manager Search bar** select the drop-down arrow and select **Patient**:

	Patient	Search for a patient	Q
I	Patient		
6	Product		Patient Repeat Prescriptions

- 2. Search for the patient and select **Details** to open the **Patient Details** screen.
- 3. Select Intervene

- **Duration** Enter the duration of the intervention.

12. The Intervention Wizard Finish screen displays. Select Finish

<u>Finish</u>

The intervention is recorded.

Stage 2

In Stage 2 of the DMS, the pharmacist/pharmacy technician dispenses the patient's first prescriptions after their discharge from hospital.

They must take account of the appropriate changes made during the hospital admission. If there are discrepancies or other issues, the pharmacy team should try to resolve them with the GP practice.

To complete Stage 2 of the DMS:

- Dispense the patient's prescription, see **Complete a Discharge Medicine Service (DMS)** on page 14 for details.
- Record Stage 2 of the DMS as an intervention in Pharmacy Manager, see Recording a Stage 2 Intervention on page 15 for details.

Dispensing the Patient's Prescription

When dispensing the patient's prescription, the below notice displays:

👜 Advanced Patient Notes		×		
Advanced Notes for Mr Dave Williams				
Notes PATIENT DISCHARGED FROM HOSPITAL 21.02.2021 CARRY OUT DMS STAGE 2/3 WHEN NEXT PRESCRIPTION ARRIVES	Other Medication			
Other Conditions	Other Sensitivities			
Adverse Drug Reactions				
		<u>о</u> к		

Dispense the prescription as usual and pay specific attention to the changes made during the hospital admission.

Recording a Stage 2 Intervention

To record Stage 2 of the DMS as an intervention, follow the process outlined in **Recording an Intervention** on page **9** for details.

Important - Ensure that you select Discharge Medication Service Part 2 from the Intervention Wizard Reason screen.

Intervention Wizard				
	Reason			
	Please er wish to re	nter the reason for the intervention and any notes you ecord.		
	<u>R</u> eason:	Discharge Medicines Service Part 2	•	
		Add appropriate notes		
	No <u>t</u> es:			
AE SP	T <u>e</u> st Results:			
2		<u>B</u> ack <u>N</u> ext Car	ncel	

Stage 3

In Stage 3 of the DMS, you must hold a confidential discussion with the patient and/or their carer to check their understanding of what medication they are taking.

After this discussion takes place, you must record it as an intervention within **Pharmacy Manager**.

Recording a Stage 3 Intervention

To record Stage 3 of the DMS as an intervention, follow the process outlined in **Recording an Intervention** on page **9** for details.

Important - I Service Part 3 fro	Ensure ti om the I	hat you select Discharge Medication Intervention Wizard Reason screen.
Intervention Wizard		
	Reason	
	Please er wish to re	nter the reason for the intervention and any notes you acord.
	Reason:	Discharge Medicines Service Part 3
		Add appropriate notes
	No <u>t</u> es:	
TEST	T <u>e</u> st Results:	
?		<u>B</u> ack <u>N</u> ext Cancel

After completing all three stages, run a DMS report within **Pharmacy Manager** and retain it as proof that all three stages of the DMS are completed. See **Discharge Medicines Service (DMS) Report** on page **17** for details.

Discharge Medicines Service (DMS) Report

Preview

You can easily run a report within **Pharmacy Manager** to show that all three stages of the DMS have taken place. To run this report:

- 1. From the Pharmacy Manager Side Navigation Bar select Reports
- 2. From the list of available reports, select Intervention Report and select
