

Pharmacy Manager Release 15.0

Pharmacy Manager 15.0 introduces the following new features and improvements:

England Only

- **New Prescriptions Home Page** - We have introduced a new **Prescriptions** screen to view your new 'ready to dispense' prescriptions with flexible filtering. This includes a new clinical check module giving you the option to perform an upfront clinical check prior to dispensing.

See [New Prescriptions User Guide \(Online Help\)](#) or [New Prescriptions User Guide \(PDF\)](#) for more details.

Note - The existing **eMessages** screen is still available if required. Changes made on one are reflected on the other.

- **EPS Exemption** - The EPS exemption **Prescribed free-of-charge HMP/prisoners/persons detained in other secure accommodation medication** is reworded to **HMP/prisoners/persons detained in other secure accommodation medication**.

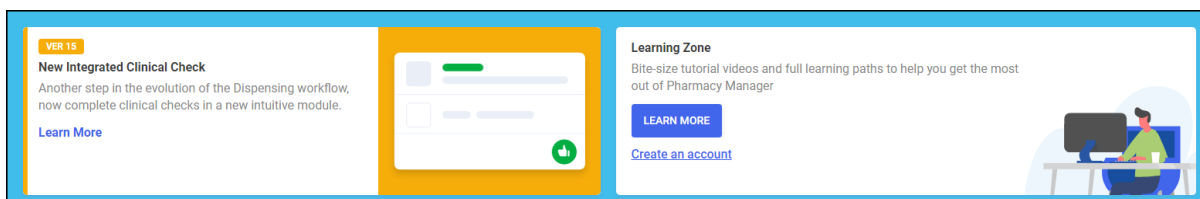

Note - This exemption should not be used to indicate contraceptives and must not be used until **HMP/prisoners/persons detained in other secure accommodation** comes into scope for EPS. When this happens, we will provide guidance.

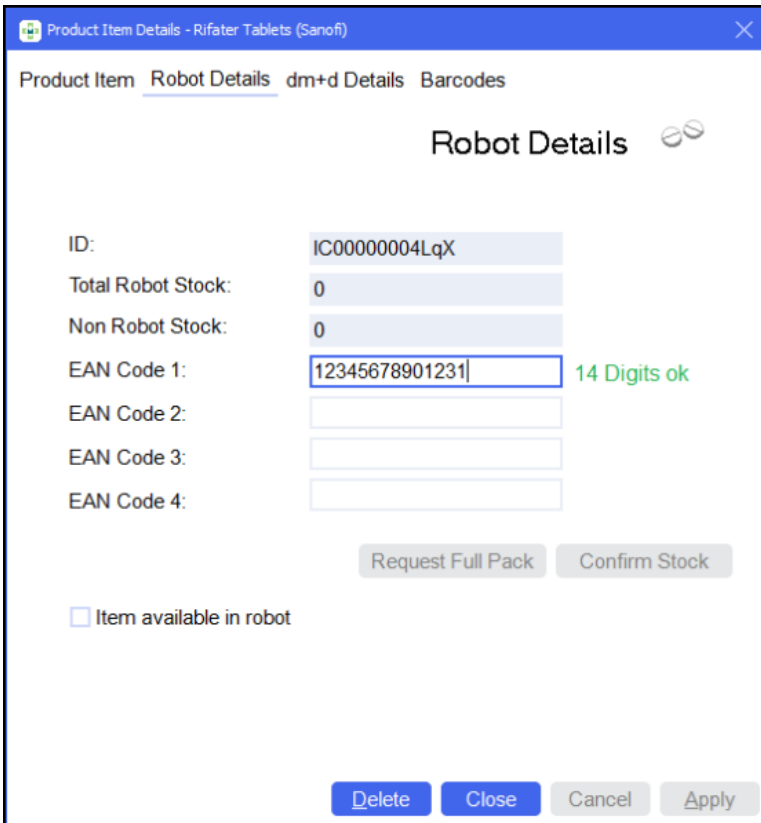

Note - Item level exemptions such as Contraceptives and Free Supply, are handled automatically by **Pharmacy Manager**, and no longer require you to select an exemption. Any known patient level exemption should still be set, for example, **Not exempt** or **Medical Exemption Certificate**.

- **Pharmacy Manager Dashboard** - The Intelligent Dashboard is updated to include a **What's New** tile and a link to the **Learning Zone**. See [Your Intelligent Dashboard](#) for more details:

Integrated Functionality

- **Robot Dispensing** - When adding products for use with robot dispensing, **Pharmacy Manager** now supports barcodes that are 8, 12, 13 or 14 digits long. For example, you can now add a product using a GTIN-14 barcode:

The screenshot shows the 'Robot Details' form for 'Rifater Tablets (Sanofi)'. The form includes the following fields and controls:

- ID:** IC00000004LqX
- Total Robot Stock:** 0
- Non Robot Stock:** 0
- EAN Code 1:** 12345678901231 (14 Digits ok)
- EAN Code 2:** (empty)
- EAN Code 3:** (empty)
- EAN Code 4:** (empty)
- Request Full Pack** button
- Confirm Stock** button
- Item available in robot
- Delete** button
- Close** button
- Cancel** button
- Apply** button

This release also includes background fixes and improvements to **Pharmacy Manager**.
