# Pharmacy Manager Release 16.0

Pharmacy Manager release **16.0** introduces the following features and improvements:

All Countries

- **Dashboard Tile** - We have updated the **Pharmacy Manager** tile at the bottom of the dashboard:

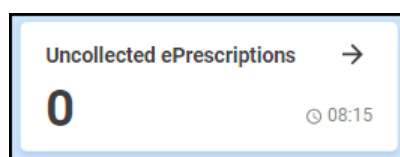

England Only

- **Healthera Integration** - The patient facing integration is now available for patients that use the Healthera application.

  See [Patient Facing Application Integration](#) in the **Pharmacy Manager Help Centre** for details.

Scotland Only

- **Dashboard** - The **Uncollected MCR Prescriptions** tile is renamed to **Uncollected ePrescriptions**:

  Note - **Uncollected ePrescriptions** currently only displays Medicines: Care & Review (MCR) prescriptions. This will be updated to include Acute Medication Service (AMS) prescriptions in a future release of **Pharmacy Manager**.

- **AMS Prescriptions** - The **Confirm Prescription Signatory** screen no longer displays when you finish an AMS prescription.

- **Instalment Dispensing AMS Prescription** - The maximum number of days supply when dispensing an AMS prescription under the form type of **GP10 (P)**, **GP10 (N)** and **GP10 (NMP)**, has now increased to 84 days supply.
