Pharmacy Services Release 3.3

Summary of Changes

Pharmacy Services release **3.3** contains the following new features:

NMS and Flu Vaccination Services

- **PDS Retrieval - GP Details** - When a patient has a verified NHS number but is missing their GP Details in **Pharmacy Manager**, a Personal Demographics Service (PDS) retrieval automatically populates the patient's GP Details (if available) in **Pharmacy Services** when starting a new **NMS** or **Flu Vaccination** service.

New Medicine Service (NMS)

- **Reviewing Medication - Character Limit** - The **Additional Notes** and **Describe other action** free text entry now allows up to 500 characters:
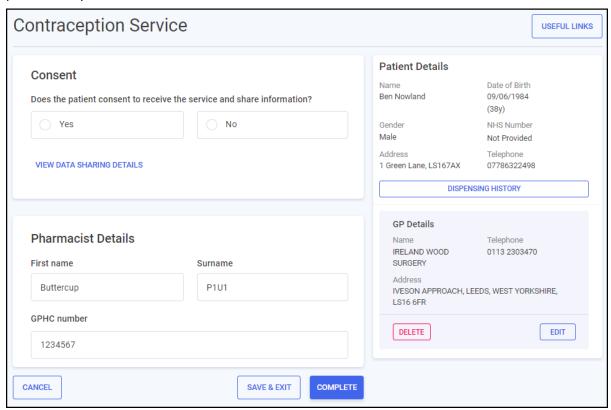

Early Adopter Phase (EAP)

ℹ️ **Important** - The **Contraception Service** is included in **Pharmacy Services** release **3.3** as part of a phased rollout, which means it is not available immediately for all pharmacies. You will receive further information about this functionality when it is available to your organisation.

Contraception Service

- The **Contraception** service allows you to record the details of oral contraceptive products and prescriptions provided to patients by your pharmacy:

➡️ See Contraception Service in the **Pharmacy Services** Help Centre for more details.

This release also includes some background fixes and improvements to **Pharmacy Services**.
