

Pharmacy Services Release 8.2

Summary of Changes

Pharmacy Services release **8.2** contains the following new improvement:

Pharmacy First, Hypertension Case-Finding Service and Contraception Services

- **Integration with GP Connect - Update Record** - When completing a **Pharmacy First, Hypertension Case-Finding Service** or **Contraception Service**, if a patient is Personal Demographics Service (PDS) verified an electronic notification is sent to their registered GP practice to update the patient's GP record once accepted. If the GP practice rejects the message for any reason, **Pharmacy Services** now automatically attempts to resend the message via NHSMail.

See this useful guide on **GP Connect - Update Record**

<https://digital.nhs.uk/services/gp-connect/gp-connect-in-your-organisation/gp-connect-update-record> for more details.

This release also includes some background fixes and improvements to **Pharmacy Services**.
