Contacting a patient directly from Vision Anywhere

If you have a mobile device with a sim card, for example a mobile phone, with **Vision Anywhere** installed, you can phone a patient directly from their record.

1. From either an iOS or Android device, open **Vision Anywhere** .

2. Log in using your Vision registered email address and password.

3. The **Home** screen displays, select **Patient Search** and find the patient required.

4. The Patient Summary screen displays. The **Patient Demographics** display at the bottom of the screen.

5. Select the **Phone** to directly dial the patient.
