Vision Anywhere for Android Release 4.7

Summary of Change

Vision Anywhere release **4.7** for Android contains the following new features and improvements:

- **Encounter Type:**

  - **Medication Management Event** - To support **Medication Reviews**, we have introduced a new **Encounter Type** of **Medication Management Event**.

    Note - Only available once the relevant SNOMED CT subset is released.

  - **Non-consultation medication data** - To support the expansion of repeat medication management, we have introduced a new **Encounter Type** of **Non-consultation medication data**. This cannot be selected manually, it is automatically allocated to the Reauthorisation of and the issuing from existing Repeat Masters.
