

# Vision Anywhere for iOS Release 4.7

## Summary of Change

- **Encounter Type:**
  - **Medication Management Event** - To support **Medication Reviews**, we have introduced a new **Encounter Type** of **Medication Management Event**.

---

 **Note** - Only available once the relevant SNOMED CT subset is released.

---

- **Non-consultation medication data** - To support the expansion of repeat medication management, we have introduced a new **Encounter Type** of **Non-consultation medication data**. This cannot be selected manually, it is automatically allocated to the Reauthorisation of and the issuing from existing Repeat Masters.
