

# Vision Anywhere v3.5 Release Guide

## Summary of Changes

### June 2020

Vision Anywhere release v3.5 contains the following new features and improvements:

- **Vision Anywhere for Business Continuity** - Vision Anywhere v3.5 installs an automatic start up. This automatically starts Vision Anywhere and prompts you to log on this in turn downloads your patient list for the last and the next 7 days so should you experience network issue, you have a valuable business continuity service. Although it is not recommended, you can switch this facility off.

See [Vision Anywhere for Business Continuity](#) on page 4 for details.

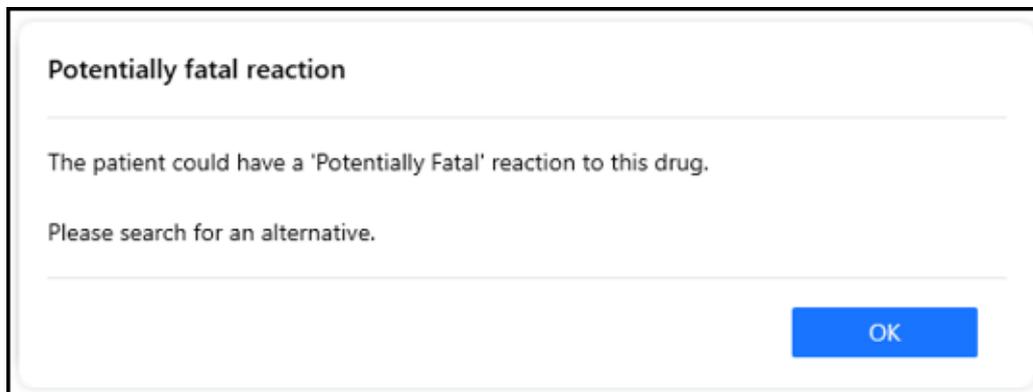

---

- **Appointments Books** – To facilitate locating the Appointments book required, they now display alphabetically.
- **Patient Summary** – Based on user feedback, the **Patient Summary** screen now displays in a vertical format, simply use the vertical scroll bar to view all available data. Section headers now display a count and can be selected to display relevant entries.
- **Recent Patients** – From your **Home** screen, **Recent Patients** now displays a list of your five most recently opened patients; these are retained across your sessions.

- **Medication** – The following changes have been made to medication as part of this release:
  - **Drug Class** – If a medication belongs to more than one drug class, you can now select which class the drug you are prescribing belongs to. Simply select **Drug class** and choose from the list offered, see Recording Medication for details.

- **Drug Class Writeback to Vision 3** – For medication added to patient records in Vision Anywhere, all associated drug classes are now written back to the patient record in Vision 3.
- **Allergies** - Where an existing allergy, intolerance or adverse reaction with a **Severity** of **Potentially fatal** exists, for a medication, you are now prevented from prescribing it:

If you add a potentially fatal allergy where the drug is already active on the patient record, you are prompted to review the medication:

**Drug Conflicts**

---

The sensitivity you have added conflicts with the patient's current medication. You should review the current medication and inactivate the repeat prescription(s), or advise the patient to stop taking acute prescription(s) if necessary.

Medication	Dosage & quantity	When
Amoxicillin 500mg capsules	1 capsule THREE times a day (supply 21)	Authorised 05-Apr-2020 by Dr Tim Torbay

The sensitivity you have added conflicts with:

Medication	Dosage & quantity	When
Amoxicillin 500mg capsules	1 capsule THREE times a day (supply 21)	Prescribed 17-May-2019 by Dr Winifred Wiltshire

OK

- **Out of Practice** - You can now record therapy that has been prescribed elsewhere, for example, over the counter medication, in a hospital or handwritten.
- **Handwritten Prescriptions** - You can now record hand written prescriptions within Vision Anywhere, simply remove the tick in **Print** when you record the prescription.
- **ACBS** – **ACBS** flags are now country specific where appropriate.
- **Display Health Promotion Data** – Where recorded in Vision 3, any Health Promotion data displays in the Clinical Record browser and any search results.
- **Display Palliative Care Data** – Where recorded in Vision 3, any Palliative Care data displays in the Clinical Record browser and any search results.
- **Gender – Unknown** and **Not Specified** gender types are now recognised in Vision Anywhere.
- **Printer Settings** – Your printer settings are now retained when Vision Anywhere updates.
- **Test Results** – The issue with units defaulting incorrectly has been addressed.
- **Uninstalling Vision Anywhere** - There is a new option from within **Settings - Application** preferences to uninstall **Vision Anywhere**

See [Uninstalling Vision Anywhere](#) on page 6 for details.

## England Only

- **QOF Indicators** (England only) – When you are searching for a clinical term in an encounter, any terms that are QOF compliant are flagged with a **QOF indicator** .
- **Print SLS endorsement** (Currently England only) – Prescriptions printed for items endorsed as Selected List Scheme now have **SLS** printed alongside the item.

## Scotland, Wales and Northern Ireland only

- **Therapy** - You can no longer prescribe, issue or reauthorise Discontinued Drugs from Vision Anywhere. This is a temporary measure and will be addressed in a future version of Vision Anywhere.

## Vision Anywhere for Business Continuity

Vision Anywhere v3.5 installs **Automatic Start** functionality into your system tray. This means that Vision Anywhere automatically starts when you log into your computer.

You can quickly see if you are currently logged in from your tool bar:

- The Vision Anywhere symbol is green when you are logged in

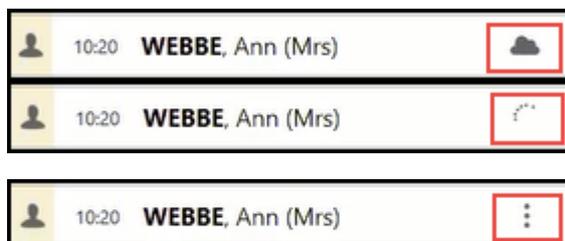

- The Vision Anywhere symbol is grey when you are logged out

## Clinicians

Once you log into Vision Anywhere, the records for patients in your appointments list, for 7 days either side of today, automatically download. Although you can see this happening, the **Cloud** next to a patient name in your appointment list turns into a **Spinner** and then into an **Option menu**, it has no impact on you using Vision Anywhere in the usual way:

- Awaiting Download
- Downloading
- Downloaded

## Administrators

Once you log into Vision Anywhere, to initiate a data download, you must select an appointment book, only the selected clinician's appointment list patients are downloaded, if you change appointment list, the previous clinician's downloaded data is retained, but the newly selected clinician's data is now downloaded.

## Updating Vision 3

When connectivity to Vision 3 is restored you must log into Vision Anywhere, this triggers the upload of the recorded consultations which updates your Vision 3 system. Please check all Encounters are closed, if the encounter is left open the details are not sent back to Vision 3.

---

 **Note** - Any open Encounters or Encounters saved on your pc are automatically deleted after 30 days.

---

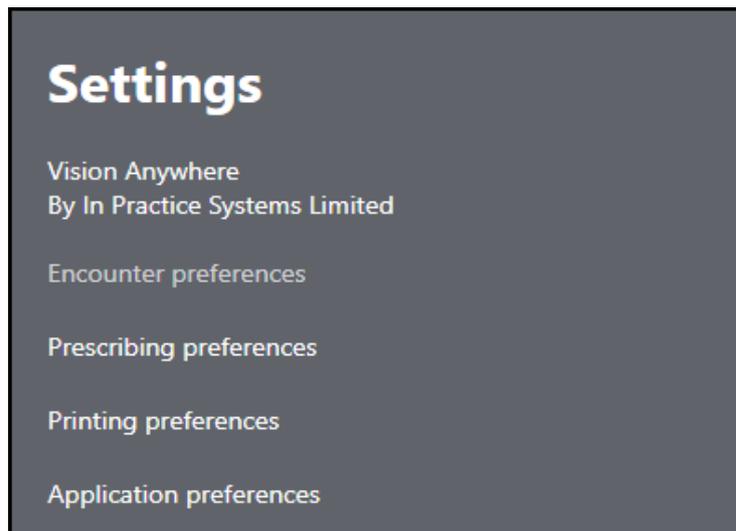

## Uninstalling Vision Anywhere

To remove **Vision Anywhere** from your workstation profile:

1. From within **Vision Anywhere**, select your name and then **Settings**:

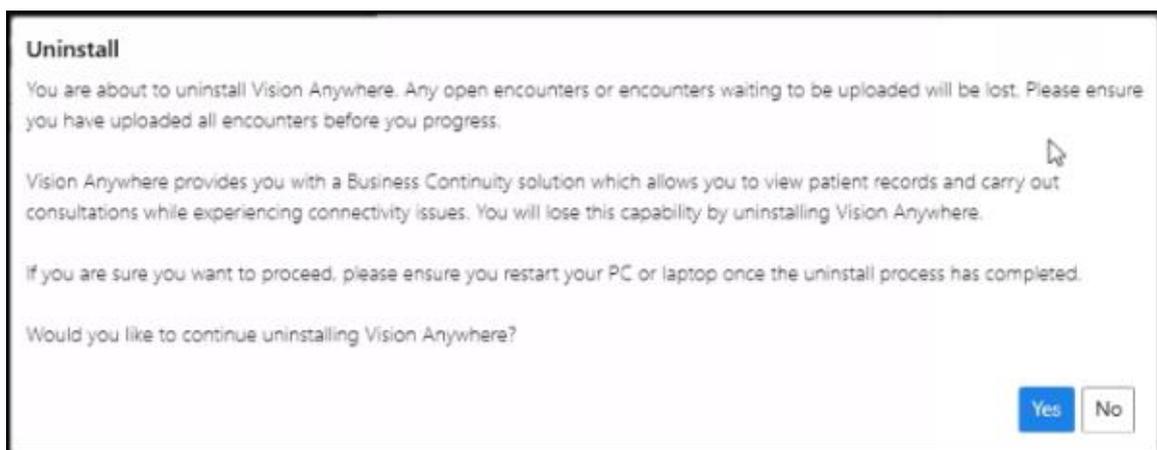

2. The **Settings** screen displays, select **Application preferences**.

**Uninstall**

3. Select **Uninstall** and the **Uninstall** warning displays:

4. Select **Yes** to continue.
5. The **Vision Anywhere Maintenance** screen displays, select **OK**.
6. Finally restart your computer.

---

**i Important** - This does not remove Vision Anywhere from any other system at your practice.

---
