Vision Anywhere for Windows Desktop Release 4.3

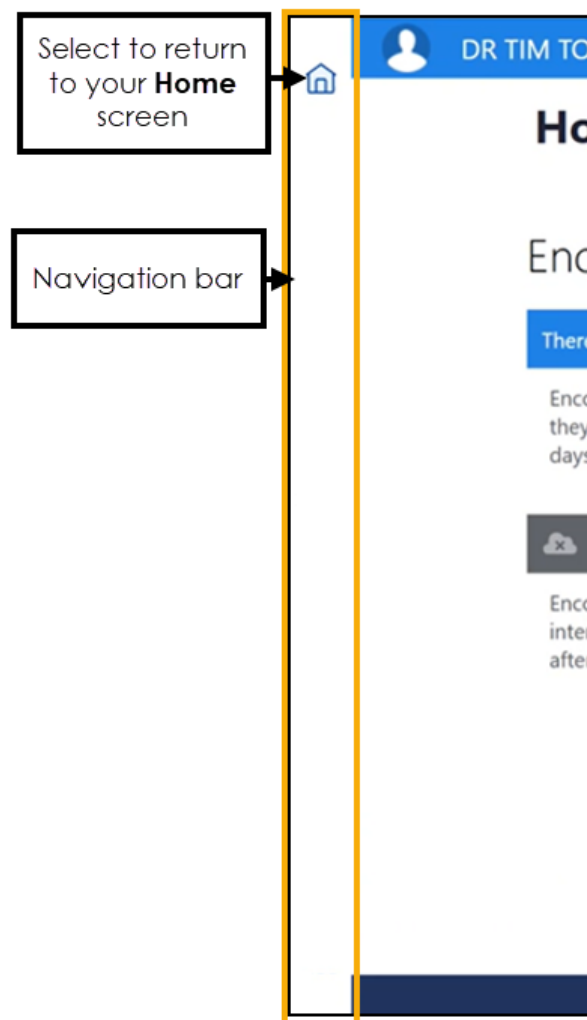

Summary of Changes

August 2021

 **Note** – This is the first release since **Vision Anywhere** release 3.8.2.

Vision Anywhere release 4.3 contains the following new features and improvements:

- **Navigation bar** - This release introduces the **Navigation bar** to **Vision Anywhere**:

Long term, this will enable many features including the ability to:

- Launch and switch applications.
- Return to your previous screen.
- Add customisable commands.
- Search for content.
- Set and maintain your settings.
- Access context appropriate Help.
- View and update your User Profile.
- See the status of services.

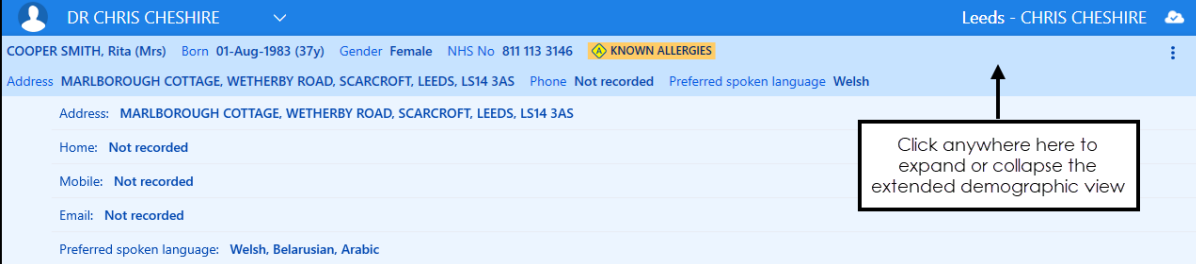

The first release enables:

- **Home** - The ability to return to your **Home** screen from any screen within **Vision Anywhere**, simply select **Home** .

If you select **Home**  when you have a data entry form open, the *'Any data you have entered will be permanently deleted. Do you want to leave without saving this entry'* message displays, select **Yes** to abandon your entry and return to your **Home** screen.

If you select **Home**  from an open **Encounter**, the *'This encounter is open and can still be edited or deleted. It has not been added to the patient record'* message displays, select **Continue** to go to your **Home** screen leaving the **Encounter** open. You have the option to disable this message in future, simply tick **Don't show this message again** if required.

- **Patient Banner** - You can now display additional demographic details from the **Patient Banner**, simply click anywhere on the **Patient Banner** to expand and collapse:

DR CHRIS CHESHIRE | Leeds - CHRIS CHESHIRE

COOPER SMITH, Rita (Mrs) Born 01-Aug-1983 (37y) Gender Female NHS No 811 113 3146 **KNOWN ALLERGIES**

Address: MARLBOROUGH COTTAGE, WETHERBY ROAD, SCARCROFT, LEEDS, LS14 3AS Phone Not recorded Preferred spoken language Welsh

Address: MARLBOROUGH COTTAGE, WETHERBY ROAD, SCARCROFT, LEEDS, LS14 3AS

Home: Not recorded

Mobile: Not recorded

Email: Not recorded

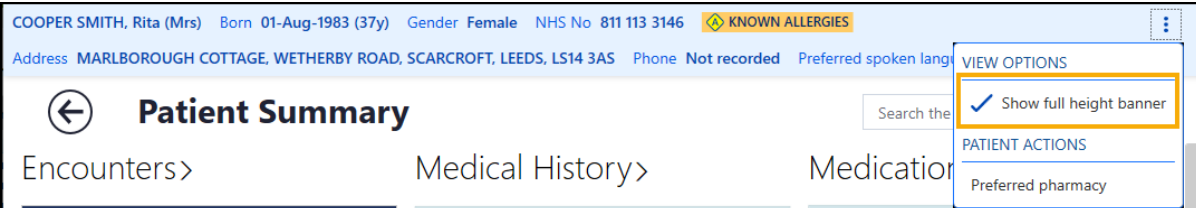

Preferred spoken language: Welsh, Belarusian, Arabic

 **Note** – All Preferred Spoken languages recorded display here.

You can now select how your **Patient Banner** displays, from

Options  - **Show full height banner:**

- Tick **Show full height banner** to display two lines of patient demographic information, including the Address and Phone Number:

COOPER SMITH, Rita (Mrs) Born 01-Aug-1983 (37y) Gender Female NHS No 811 113 3146 **KNOWN ALLERGIES**

Address: MARLBOROUGH COTTAGE, WETHERBY ROAD, SCARCROFT, LEEDS, LS14 3AS Phone Not recorded Preferred spoken language Welsh

- **Preferred Spoken Language** - The latest recorded **Spoken Language** selection from **Vision 3**, where **Preferred Spoken Language** is selected, now displays on the full height **Patient Banner**:

COOPER SMITH, Rita (Mrs) Born 01-Aug-1983 (37y) Gender Female NHS No 811 113 3146	KNOWN ALLERGIES	⋮
Address MARLBOROUGH COTTAGE, WETHERBY ROAD, SCARCROFT, LEEDS, LS14 3AS	Phone Not recorded	Preferred spoken language Welsh

Shared Care Setting - In a Shared Care Setting, **Preferred spoken language** displays as **Unavailable** until you select to record a consultation with consent, then it displays on the **Patient Banner**.

- **Interpreter** - The latest **Interpreter** entry, with a clinical term from the **SNOMED CT** reference set **Accessible information - requires communication professional + need for interpreter**, recorded in the patient record, now displays in an **Information Banner** just under the **Patient Banner**:

🔔 The patient requires support with communication: Belarusian language interpreter needed

Shared Care Setting - In a Shared Care Setting, **Interpreter** does not display until you select to record a consultation with consent and then it displays on the **Information Banner**.

- **Prescribing** - The following new features and improvements are included in this release:
 - **Prescription Manager** - The **Prescription Manager** screen replaces the **Print Prescription** screen. It introduces the following features and updates to **Vision Anywhere** functionality:
 - **Active** - Select to display prescriptions to be printed.
 - **Recent** - Select to display items that can be reprinted.
 - **Clinician to Sign** - Select the signing clinician for the prescription.
 - **<F9>** - You can now use the **<F9>** key to access **Prescription Manager** and then **<F9>** again to print all active prescriptions.

➔ See **Prescription Manager** on page 9 for full details.

- **Authoriser's name** - When recording medication, the **Clinician** name option has been renamed **Authoriser's name**:

Date	Time
16 February 2021	17:41
Authoriser's name	
Miss Wendy Smith	

- **Independent and Supplementary Nurse Prescribers** - Your nurse prescribers, both **Independent** and **Supplementary** are now available to select from **Authoriser's name**. As with all clinicians, if the nurse prescribers are logged in, **Authoriser's name** defaults to their name, if a non-clinician is logged in, the Usual GP is the default, but independent and supplementary nurse prescribers are now available to select.
- **Prescription Printing** - You can now select to change the orientation that your prescriptions print. As with all prescription printing, this is a 'by printer' setting. All prescription printers default to **Portrait**. To update this setting:
 1. From the **Settings** menu, select **Prescription printing preferences**.
 2. Select the printer required and select the **Page orientation**.

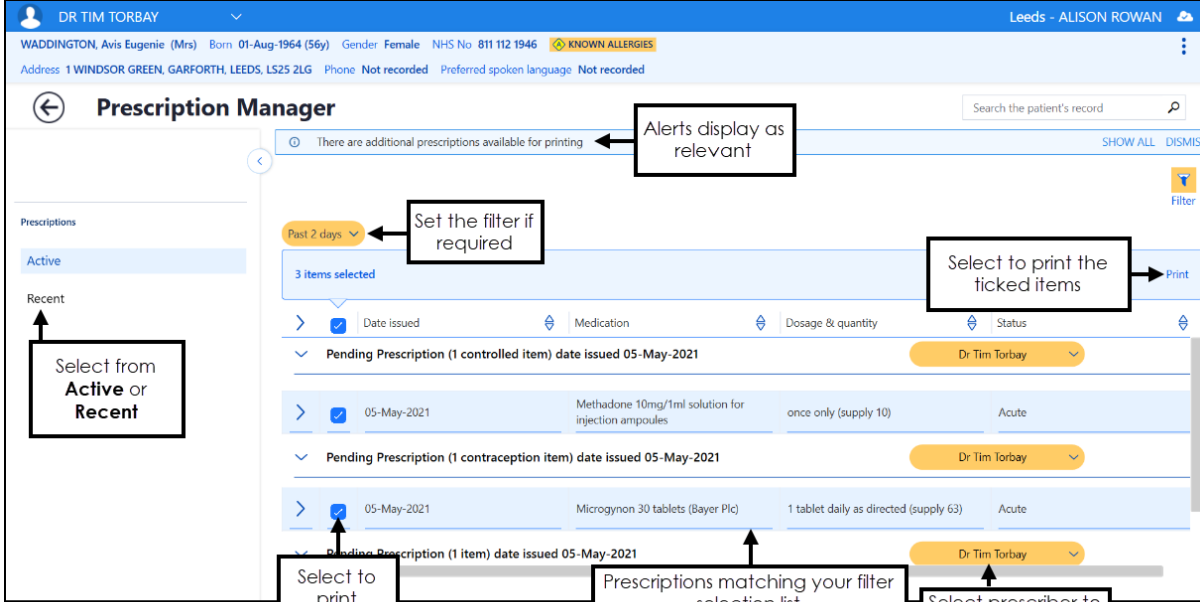

See [Prescription Printing Preferences](#) on page **15** for full details.

- **Test Qualifiers** - You can now view, add and if necessary update result qualifiers for a test result.
- **Downloaded Patient Records** - Downloaded patient records, that have not been updated, are now stored on your device for 7 days and then automatically deleted.
- **Drug Allergy form** - The issue with any SNOMED CT term being available via the concept ID search in the **Drug Allergy** form has been addressed. You can now only select terms from the Drug Allergy concepts.
- **Follow-up** - The issue with the SNOMED CT term 'Follow-Up' writing back incorrectly as 'Hospital Follow-up' has been addressed.
- **First Contact Physiotherapy (FCP)' template** - The issue with **OK** not being available if you have added a comment alongside a Red Flag has been addressed.
- **Appointments** - The issue with the **Appointments** list displaying if the **Next Appointment** is for a restricted patient has been addressed.

Prescription Manager

All prescription printing in **Vision Anywhere** is done from **Prescription Manager**. No matter where you select to print a prescription from in **Vision Anywhere**, the **Prescription Manager** screen displays:

The screenshot shows the Prescription Manager interface for a patient named Alison Rowan. The interface includes a patient header with details like name, date of birth, gender, and NHS number. Below this is a search bar and a 'Prescription Manager' title. A notification banner at the top states 'There are additional prescriptions available for printing', with a callout 'Alerts display as relevant' pointing to it. A filter dropdown is set to 'Past 2 days', with a callout 'Set the filter if required'. On the left, there are tabs for 'Active' and 'Recent', with a callout 'Select from Active or Recent'. The main area displays a list of prescriptions with checkboxes for selection. A callout 'Select to print' points to a checkbox. A callout 'Prescriptions matching your filter selection list' points to the list of items. A callout 'Select prescriber to sign' points to a dropdown menu. A callout 'Select to print the ticked items' points to a 'Print' button.

The **Prescription Manager** screen consists of the following sections, both sections group items as contraceptives, controlled drugs and then standard items:

- Prescriptions: consists of two views:
 - **Active**, selected by default, displays any unprinted items in the specified date range:
 - Items added today are automatically selected for printing, remove the tick to deselect an item.
 - The default date filter is two days, if there are unprinted items outside of that range, the 'There are additional prescriptions available for printing' alert displays at the top of the **Prescription Manager** screen, simply select **Show all** from the alert banner or select a wider date range from the **Filter**  to view other unprinted items.

Training Tip - SHOW ALL displays every unprinted item from the last four weeks.

See **Printing Prescriptions** on page **11** for further details.

- **Recent**, select to display:
 - Items printed in the last week by default.
 - Select items printed in a specific time frame by selecting from the filter.

 See [Reprinting a Prescription](#) on page **13** for further details.

 **Note** - The general **Filter**  is in place for future functionality, if selected it currently hides the **Prescription Manager Filter** . Select the **Filter**  again to redisplay the **Prescription Manager Filter** .

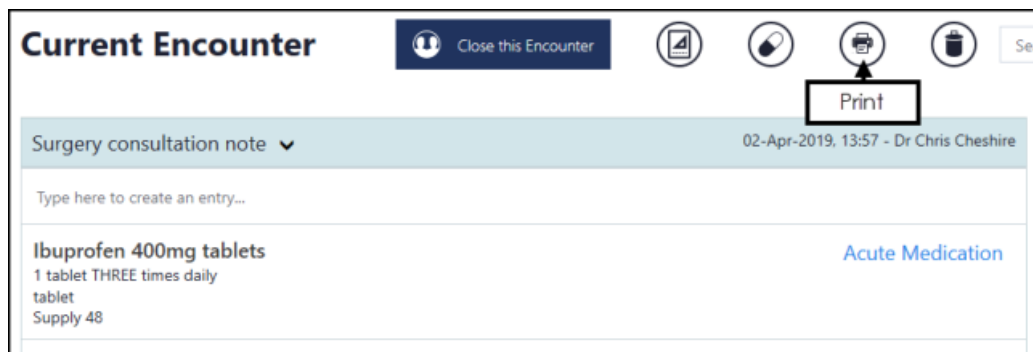

Printing Prescriptions

To print acute(s) or issued repeat medication, you can select to print ...

...from **Current Encounter**:

1. Select **Print** from the top of the current encounter view, or simply press **<F9>**:

...from **Medications**:

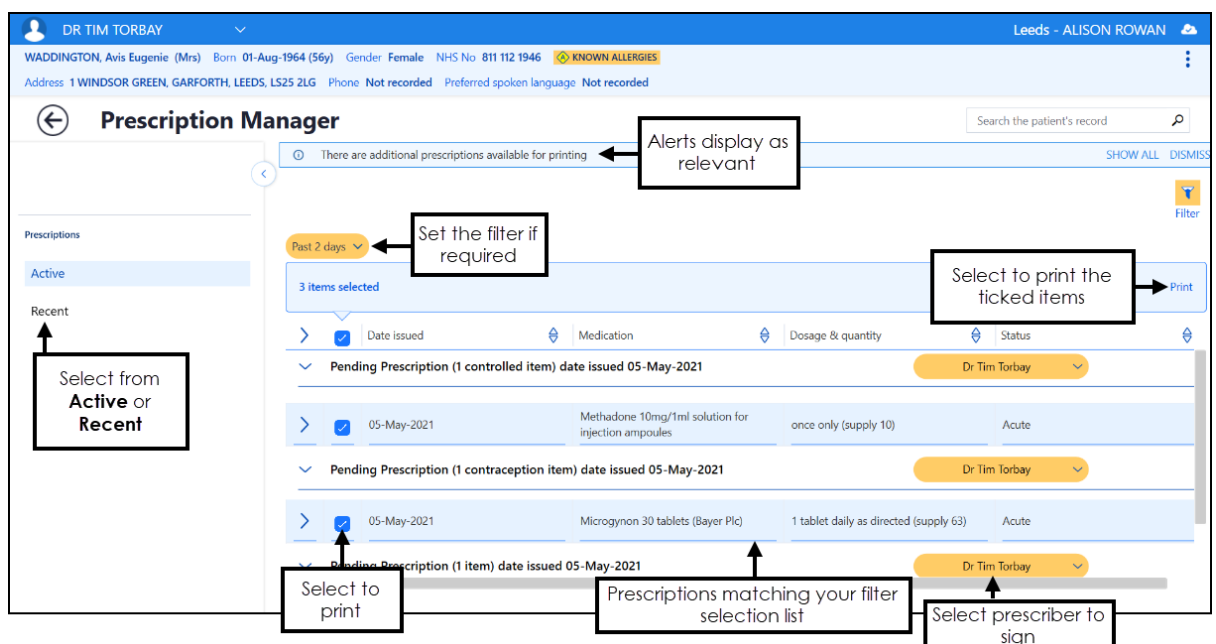

Note - You do not need an open an **Encounter** to print prescriptions.

1. From the **Patient Summary** screen, select **Medication** and then either select **Printing**, or press **<F9>**:

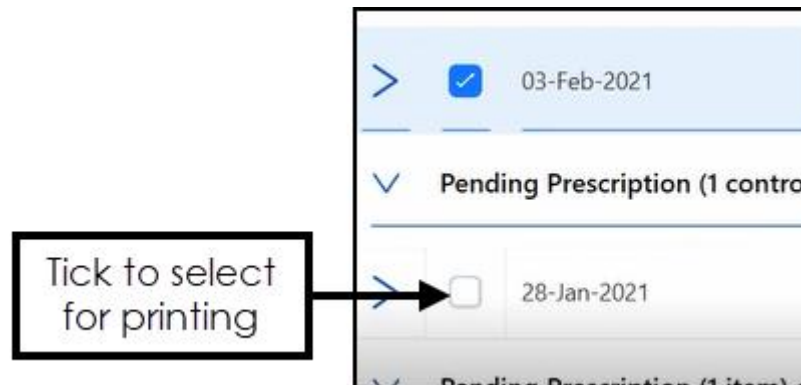

2. The **Prescription Manager** screen displays:

3. Items prescribed today are automatically selected, remove the tick from any items you do not want to print.
4. If there are other items available to print, the 'There are additional prescriptions available for printing' banner displays:

Select **SHOW ALL** or use **Filter** Past 2 days ▾ to display and then tick any other items to print:

 **Note** - If you are printing items with different issue dates, they are printed on different prescriptions.

5. Check the clinician to sign is correct and update if required.
6. Select **Print**, or simply press **<F9>**.

The 'Successfully sent to printer' message briefly displays and then the screen refreshes, displaying either any unprinted items you opted not to print, or the nothing to display screen.

 **Important** - After an item is printed, even if the encounter is still open, a prescription cannot be edited or deleted.

 See [Reprinting a Prescription](#) on page 13, [Recording Medication](#), [Issuing Repeat Medication](#) and [Prescription Manager](#) on page 9 for further details.

Reprinting a Prescription

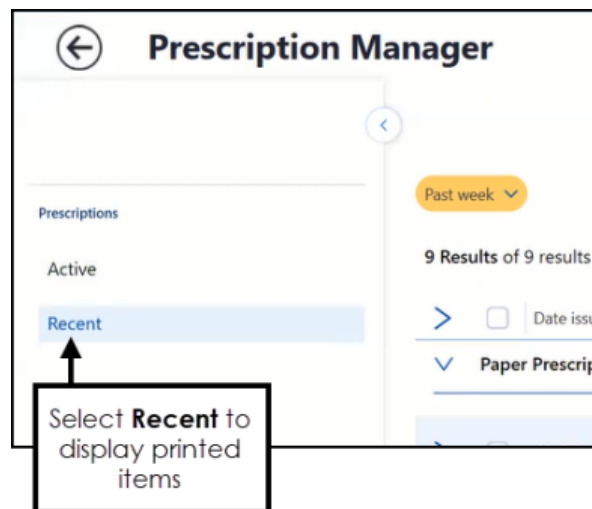

In the event of a patient losing a prescription or the printer jamming, a prescription can be reprinted.

i Important - You can only reprint a prescription issued in the last 28 days.

To reprint a prescription:

pencil Note - For patients registered at a **Vision** practice, you do not need an open **Encounter** to reprint prescriptions. In a **Shared Care Setting**, for a patient registered at an **EMIS** practice, you cannot reprint a prescription once the Encounter it is was added in, is closed.

1. Select the patient in the usual way.
2. From the **Patient Summary** screen, select **Medication**.
3. Select **Printing** and the **Prescription Manager** screen displays.
4. Select **Recent**:

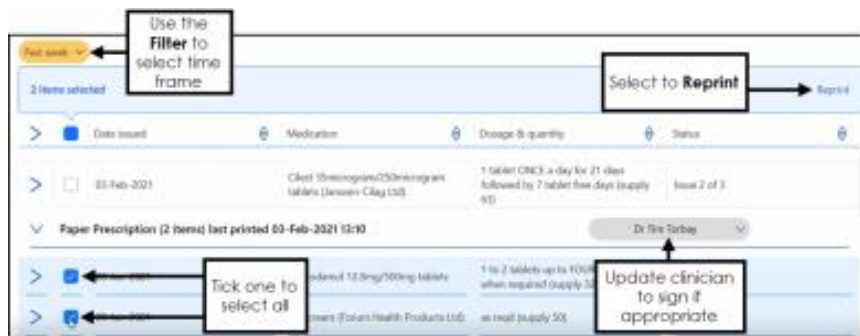

5. Items printed in the last week display by default, select a wider time frame using the **Filter**  if required. Tick the item(s) you want to reprint.

💡 Training Tip - Select one item from a prescription for all of the items printed as part of that prescription to be selected. Remember, you cannot reprint part of a prescription it must be a whole reprint.

6. Check the clinician to sign is correct and update if required.

7. From the banner, select **Reprint**, or press the <F9> key:

8. The **Reprint reason** screen displays, select the reason from the available list as appropriate:

 **Note** - If you select **Other**, you must enter explanatory notes.

Reprint reason

- Printer problem
- Script was damaged/destroyed
- Stolen
- Patient lost script (genuine)
- Patient lost script (query)
- Pharmacy lost script
- Practice lost script
- Other (please specify)

Other reason

Enter a reason for reprinting this prescription.

Select a reason for the reprint and then select OK

9. Select **OK** to print and update the patient's record.

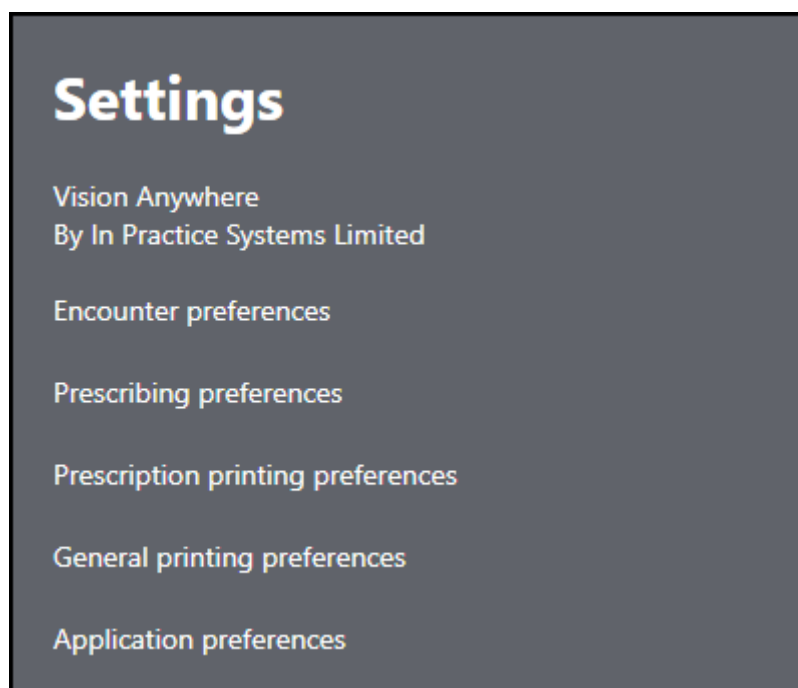

Prescription Printing Preferences

To customise your Prescription printing preferences:

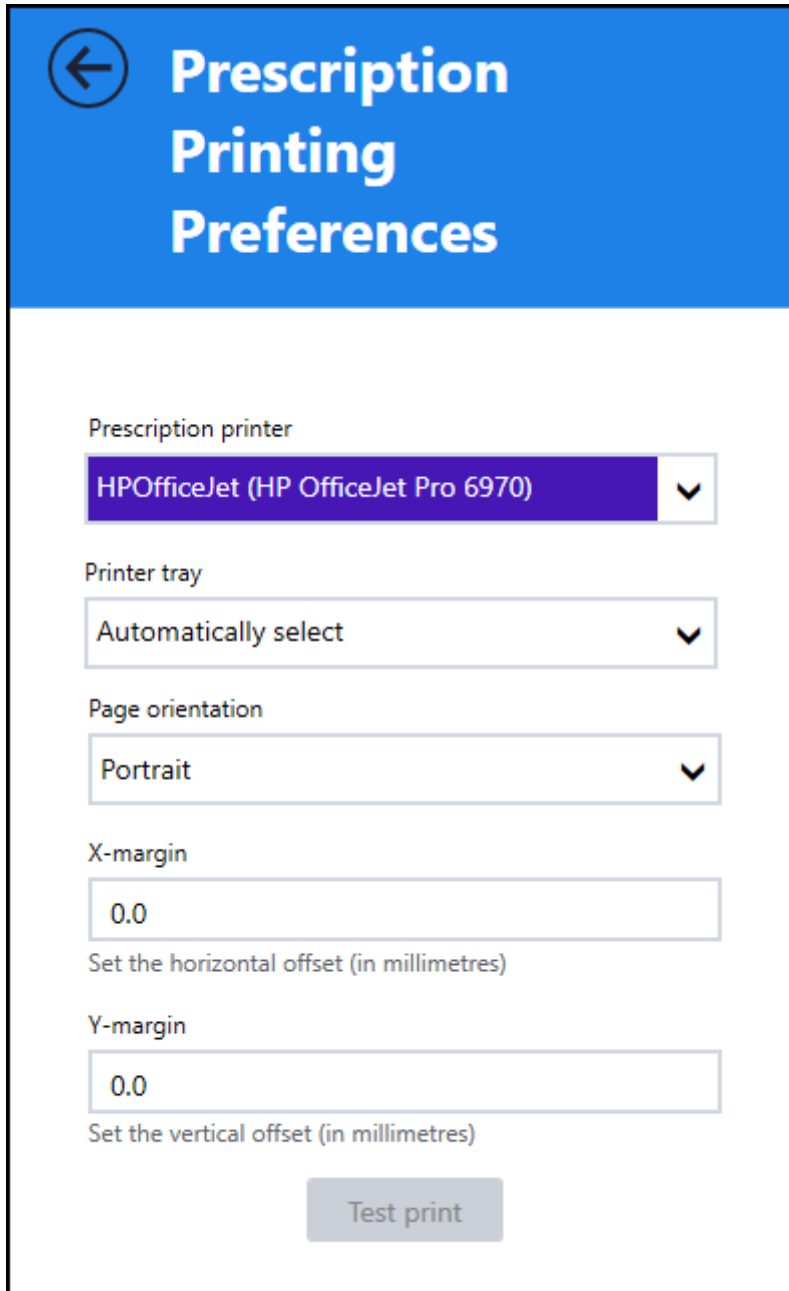

1. From **Vision Anywhere**, select the arrow next to your name, and select Settings:

2. The **Settings** list displays:

3. Select **Prescription printing preferences** and the **Prescription printing preferences** screen displays:

← **Prescription Printing Preferences**
