

# SIS 10510 Vision Release Guide

SIS 10510 delivers the following Vision+ changes:

### **Summary of Changes**

May 2020

#### Vision+ SNOMED CT

SNOMED CT – The latest SNOMED CT April dictionary is implemented in SIS 10510 and includes the Coronavirus concepts. For more information on Vision's Coronavirus guidance see https://info.visionhealth.co.uk/coronavirus-advice

**Note** – All countries now have access to the Coronavirus clinical terms in Vision 3 (using local terms). However, in the background the entry is mapped to a SNOMED CT term. See <u>http://help.visionhealth.co.uk/Vision Consultation Manager Help Centre/</u><u>Content/ConMgr/General/Vision\_Local\_Codes.htm</u> for details.

#### QOF

**QOF England** – SIS 10510 removes the restriction to only display sixty SNOMED CT terms in a QOF template.

#### Vision+ Template Designer

- Codeset Rows When adding a Codeset row to a template, you can hide the SNOMED CT term/Read code and description, so it does not display when viewing the template in the patient record. See <u>Hiding the description</u> on a Codeset Row.
- SNOMED CT Browser Search The SNOMED CT browser within Template Designer now defaults to Terms when searching for a SNOMED CT term. See <u>SNOMED CT Browser Search</u>
- SNOMED CT Filter Options Previously if you entered a SNOMED CT term in the search box, then changed the search options, for example, Hierarchy, the SNOMED CT term was removed and required re-entering. SIS 10510 fixes this issue. See <u>SNOMED CT Browser Search</u>

Vision<br/>The Bread Factory<br/>1a Broughton Street<br/>London SW8 3QJwww.visionhealth.co.uk<br/>T +44(0) 20 7501 7000<br/>F +44(0) 20 7501 7100

- **SNOMED Reports** Reports within **Practice Lists** that include SNOMED CT terms run faster on receipt of SIS 10510.
- Data Extracts The Data Extract option from Practice Reports enables data to be extracted into a CSV (Comma Separated Value) file and forwarded to HB's. The issue of extracts being downloaded every night regardless of version number is addressed.
- Contract Manager The practice list size is now correct when viewing within the **Payment Details** section of **Contract Manager**.
- Mail Merge There was a discrepancy between the All Patient and Individual QOF mail merge lists if a patient had a status of Seen represented by three dots (...). The All Patient list displayed 1st invite instead of the three dots. SIS 10510 resolves this.
- Practice Lists The issue of some calculators displaying in lists, has been addressed.

#### **Download Web Files**

• **Pathway ID** – Pathway IDs display when downloading a template from **Download Web Files**. See <u>Download Web Files</u>.

## **Vision+ Template Designer**

Some additional changes are implemented in Vision+ Template Designer:

## Hiding the description on a Codeset Row

When adding a **Codeset** row to a template, you can hide the SNOMED CT term/Read code and description, so it does not display when adding.

Below is an example of a template with the SNOMED CT/Read term displayed and with the term hidden:

	4			Tester for GREE	N, ELLICE ADENE [13/06/2003]				
Home	Арр	Appearance							
Save & Close	Code	set Show	Indicator rs Logic	Mon 20/0	04/2020 👻 Tab 🧬 Next Tab				
File	File Controls								
History Tester									
Codeset Codes - MS GREEN, ELLICE ADENE [13/06/2003]									
🛕 🚑 Comments >> Show More									
Apply	Priority	Episode Type	Event Date	Code	Description				
			20/04/2020	24431000000100	Message given to patient (finding)				

The SNOMED CT/Read term is visible on the Codeset Add row

The SNOMED CT/Read term does not display on the Codeset Add row

This section summarises adding a Codeset row and changing the row, so the description does not display in the template:

- 1. From Template Designer, select Home and Add Codeset Row
- 2. Your new Codeset row displays on the template:

- 3. Type a description. This can be up to a maximum of 50 characters.
- **4.** Select **Codeset** at the end of the row to assign your terms.
- **5.** The **Code Search** screen displays:

U Code search	x				
🔯 🚔 << Less Detail >> More Detail Data Entry Subset Primary	Care Subset Active Only Partial Match				
code 👻 description	Code V Description V Hierarchy V Preferred V Apply V				
24441000000109 Message from patient (finding)					
286261000000101 Short message service text message received from pati					
279991000000102 Short message service text message sent to patient (provide	To search on part				
	keywords, select Partial				
To choose a term 🛩	Match				
highlight it and select					
the insert arrow					
	Type the term and				
	select Search				
4 H					
Library reference sets TRUD clinical reference s	ets o Terms O Hierarchy				
mess to patient	OK Cancel				

- 6. To search on part keywords, select Partial Match.
- 7. Type the term in the search box and select Search.
- **8.** From the list of terms, select the term required and choose the **Insert arrow**. The SNOMED CT term displays on the right-hand side of the screen.
- 9. To close the Code Search screen, select OK.

**10.**Now, select the option to **Hide the Description** 

## Select the option to hide the description

Message to patient

#### **<u>11.</u>**The **Hide the Description** screen displays:

**<u>12.</u>**To hide the description, select **Yes** then select **OK**.

## **SNOMED CT Browser Search**

The SNOMED CT Code browser search is enhanced in Template Designer. The search now defaults to Terms when searching for a SNOMED CT term.

The issue of you having to re-enter the term if you change the search has been addressed.

U Code search					Х
🛕 👜 << Less Detail >> More Detail Data Entry Subset	Primary Care Subset	Active Only	Partial Match		0
code description You no longer need to re-enter the term in the search box if you change the search options at the bottom of the screen e.g. Library reference sets, TRUD, Term or Hierarchy	Code V Der	the SN	MED CT bro	Preferred Apply	w defaults to
