

Vision SIS10560 Release

Summary of Changes

November 2020

The following changes are included in the **Vision 3** SIS10560 release:

Vision+ SNOMED CT

- The latest v30.2.0 SNOMED CT dictionary release is included in SIS 10560, this includes additional Coronavirus concepts. For more information on Vision's latest Coronavirus guidance see [Vision Coronavirus Advice](#).

Note - All countries have access to the latest Coronavirus terms using the Vision local codes which map to SNOMED CT terms in the background, see [Vision Local Codes](#) for details.

QAIF - Wales Only

- The issue with the Influenza season date ranges has been addressed in SIS10560:
 - **FLU001W** - The percentage of the registered population aged 65 years of more who have had influenza immunisation in the preceding 1 August to 31 March.
 - **FLU002W** - The percentage of patients aged under 65 years included in (any of) the registers for CHD, COPD, Diabetes or Stroke who have had influenza immunisation in the preceding 1 August to 31 March.

Vision+ License Server

- The issue being experienced by some practices without internet access on start up, has been addressed.

Practice Reports - Mail Merge Update

- The issue of the patient patients record not being updated correctly with the appropriate invitation codes following a mail merge on **QOF - Extra Indicators** has been addressed.
