

Prescribing 2DRX Prescriptions Remotely Using Vision Anywhere - Wales only

If you are using **Vision Anywhere** for your remote consultations, you can send any acute therapy back to **Vision 3** to print as a 2DRX prescription. This quick reference guide summarises the steps you must take to achieve this.

Workflow

Downloading and Importing the Acute Therapy Added - Not Yet Printed Search

To download and import the **Acute Therapy Added – Not Yet Printed** Search:

1. From the **Search and Report Help Centre**, from Downloads – Vision 3 Predefined Searches, select the **Acute Therapy Added - Not Yet Printed** and run through the download wizard, see [Search and Report Help Centre - Downloads – Vision 3 Predefined Searches](#) for the **Acute Therapy Added – Not Yet Printed** search.
2. Now, log into **Vision 3** if you are not already logged in, select **Reporting – Search and Reports**.
3. From the **Search export and import pane**, select **Browse** .
4. Navigate to the search file you have just saved, highlight it and select **Open**.
5. The file opens in the **Search export and import** pane.
6. Right click on the search and select **Import**.

The search is now added to the list of saved searches in the left hand pane and is ready for use.

See [Importing Searches](#) for help with importing **Searches**.

Adding Acute Therapy Remotely and Issuing as 2DRX

To add an acute therapy and issue it as a 2DRX prescription:

Remote Clinician

1. From **Vision Anywhere**, select the patient required and open an **Encounter** in the usual way.
2. Enter part of the drug name required, a minimum of three characters is required, a list of matching items displays. Add a space and the form for a shorter list, for example, amox cap for amoxicillin capsules.
3. Select the medication required and the **Add Prescription** screen displays.
4. Complete as required.
5. Select **Prescribe** to save.
6. Finish and close the Encounter.

Any member of staff

7. From **Vision 3 – Reporting – Search and Reports – Ad-hoc Search & Reporting**, select and run the **Acute Therapy Added - Not Yet Printed** search to find all unprinted therapy in the last day and create a group from the result.

8. From **Consultation Manager**, select **Consultation – Select a Patient Group**.
9. The **Consultation Manager – Groups or Clinical Audit Search Browser** displays, select **Group**.
10. Highlight the **Unprinted Acutes** group you have just created and select **OK**.
11. The group of patients with unprinted acutes added today displays, select the top patient and select **Select the Group Patient** .
12. The selected patient's record displays.
13. Press **<F9>** twice and the prescription prints ready for signing.
14. Select **Next Group Patient**  to open the next member of the group.
15. Repeat from step 13 above until all patients have been processed.

Clinician

16. Sign all the prescriptions printed as required.
