

South East Wales Cardiac Network Guideline

Introduction

The South East Wales Cardiac Network (SEWCN) brings together key organisations involved in the planning, commissioning and delivery of cardiac services across South East Wales to improve cardiac services for patients.

These guidelines were designed and written by Dr Armon Daniels - GP Lead SEWCN, with the help and technical advice from the INPS Training Team.

Any queries regarding the contents and Read codes included should be directed to a member for the SEWCN.

Getting Started

Downloading the SEWCN Cardiology Guideline

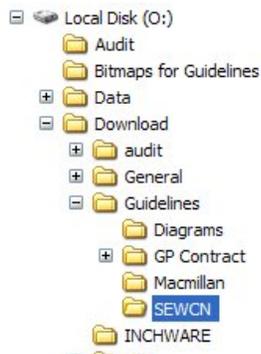

There are two guidelines to download:

- SEWCN Cardiology Referral - this is for data entry.
- SEWCN Cardiology Referral Print Out - this is a report which goes straight to the printer.

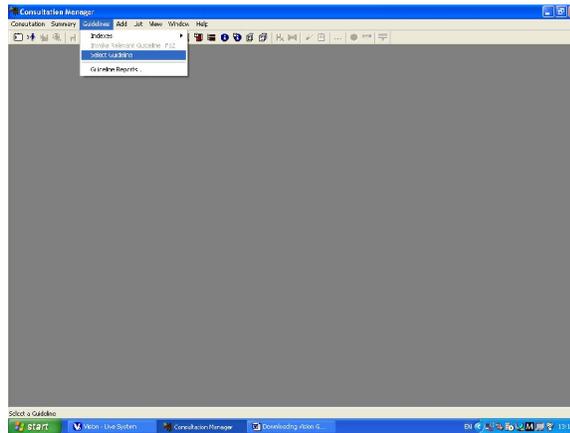

1. Download the guidelines from the INPS website - Client Zone - Downloads - Wales, and unzip them.

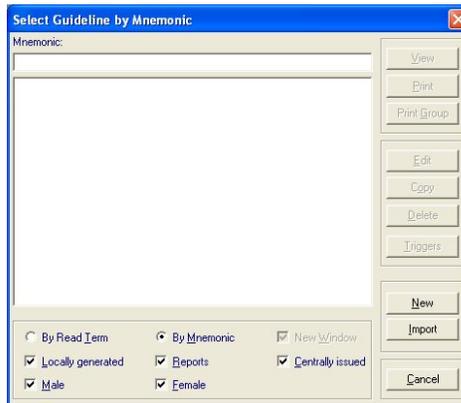

2. Currently the files unzip to O:\download\guidelines. We advise you to move the SEWCN files into a newly made folder called SEWCN in O:\download\guidelines.

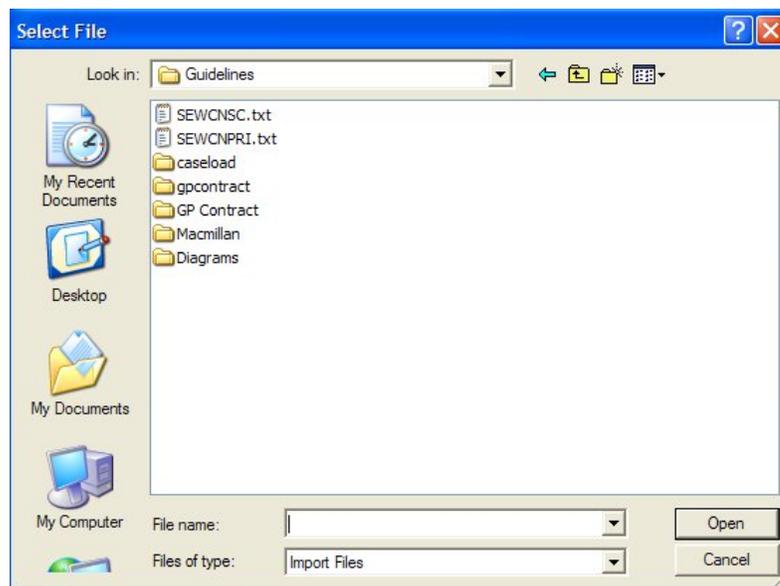

3. Open up VISION and then Go to Consultation Manager
4. Select Guidelines - Select Guideline.

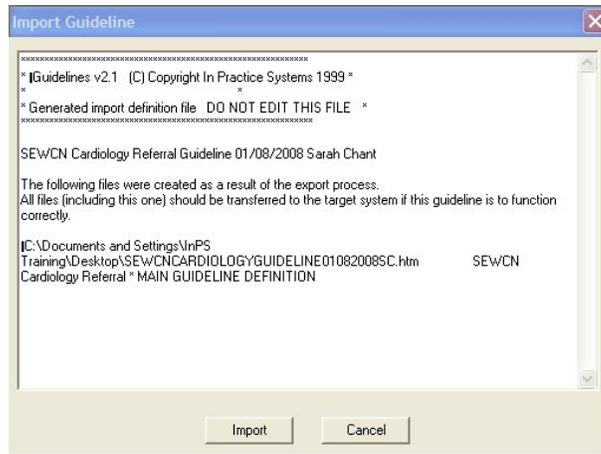

5. Left click on I mport.

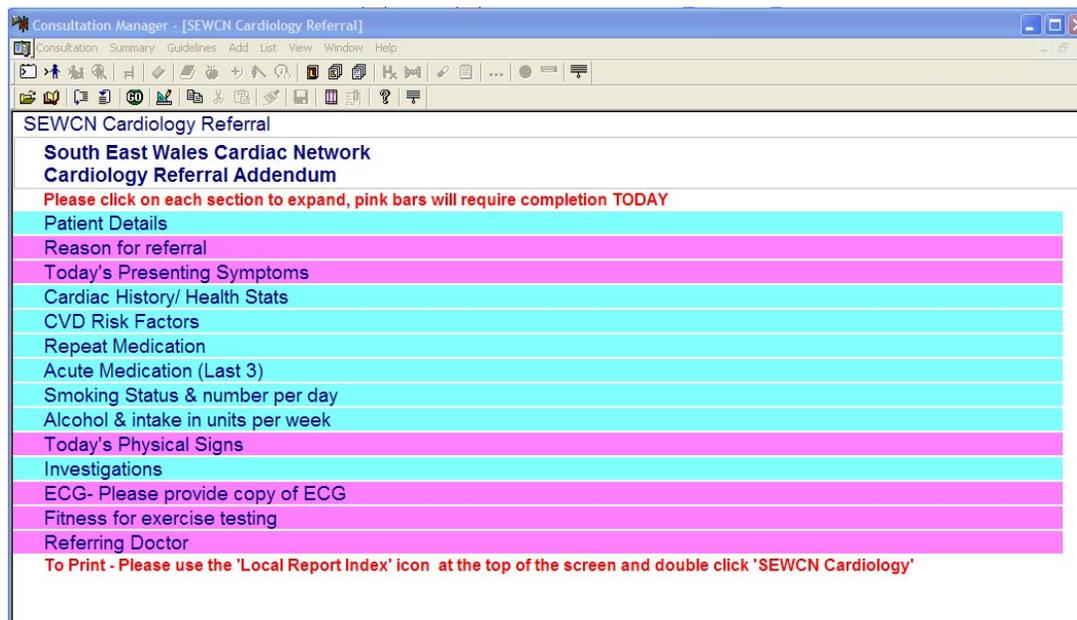

6. Find the SEWCN files.

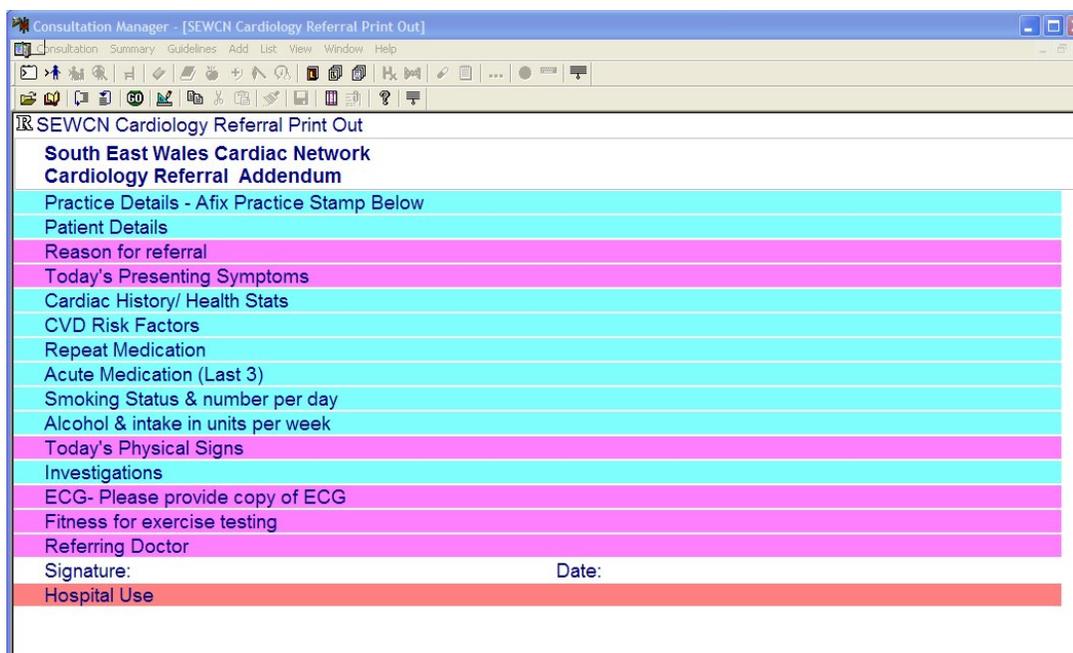

7. Click on SEWCNSC.txt for the SEWCN Cardiology Referral guideline.
8. Left click on Open.
9. Left click on Import. This step may take a little while.

The following screen should appear if the guideline has imported correctly!

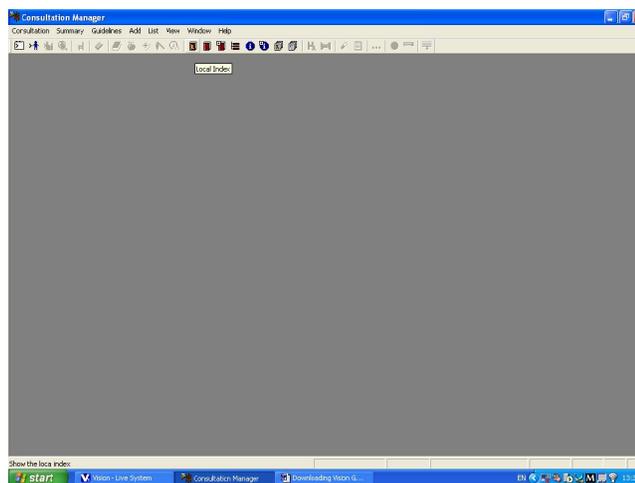

- Repeat steps 5-9, this time selecting SEWCNPRI.TXT to import the SEWCN Cardiology Referral Print out guideline.

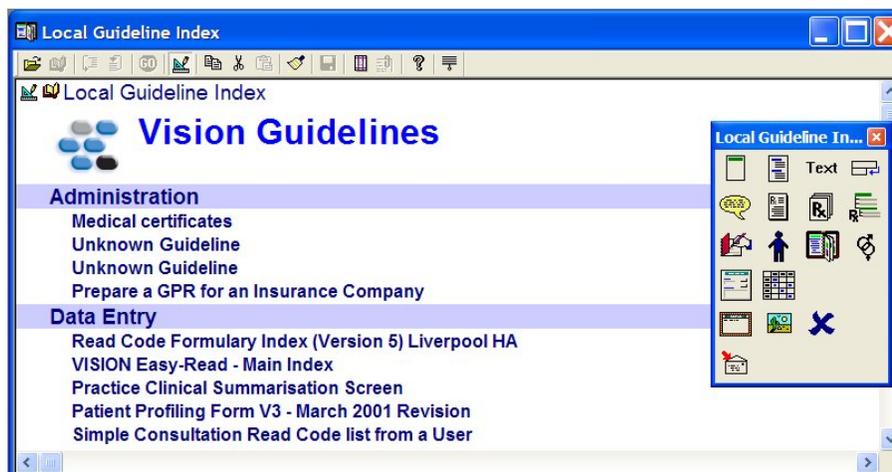

Adding the guidelines to the Local Guideline Index

- Close down the Guideline screen by clicking on the Close icon  to the right of the question mark icon on the lower toolbar.
- Click on the Local Guideline Index icon .

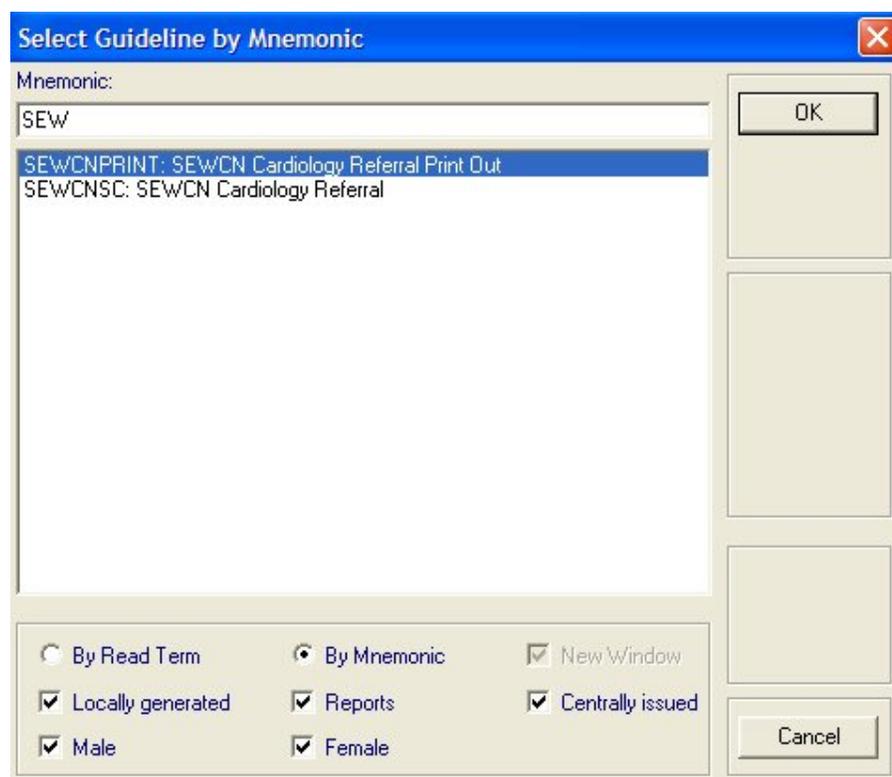

3. Click on the Maintain button .

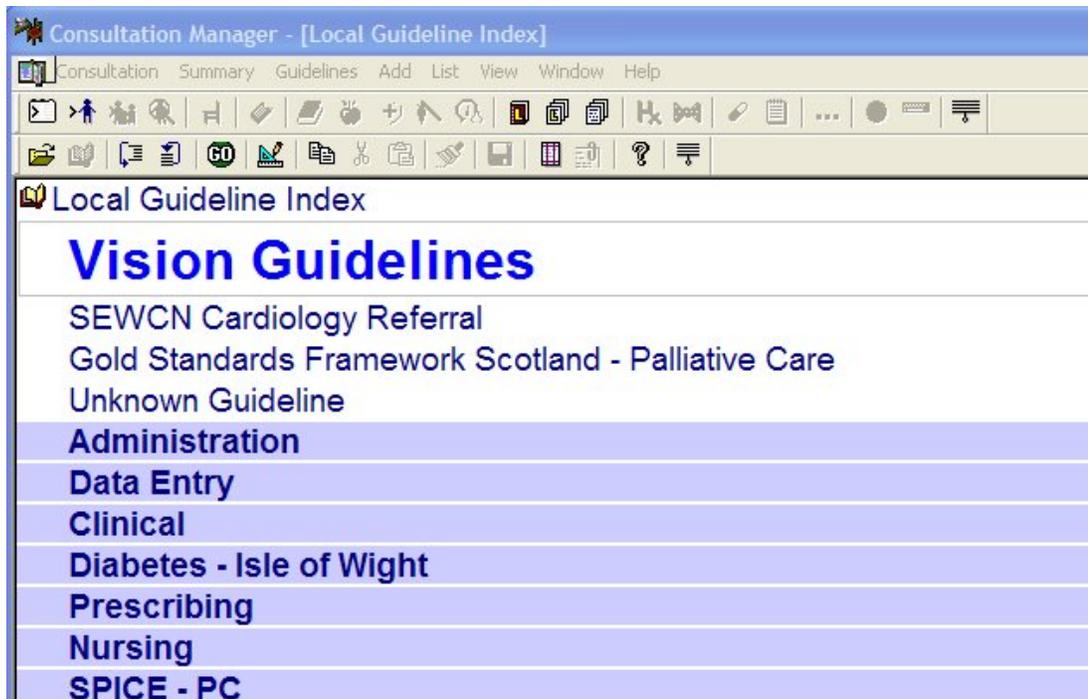

4. Position your cursor on the line just below the Vision Guidelines line.

5. Click on the Embed Guideline icon  from the floating options.

6. Type SEW and press Enter in the Mnemonic field and select SEWCNSC: SEWCN Cardiology Referral.

7. Click on the Embed Guideline icon again, and this time select the SEWCNPRINT guideline.
8. Click on the Maintain button  again to close
9. If the guidelines have not appeared in the part of the index you want it to appear in, you can drag and drop it to a new position.
10. Close the Local Index by clicking on  and answer Yes to save the changes.

- SPICE - PC**

Using the data entry guideline

Click on the Local Guideline Index icon  and select SEWCN Cardiology Referral.

- This guideline can be used for data entry using the buttons provided.
- Expand all sections by clicking on Expand All icon 
- A list of relevant Read codes is given on page 11.

The screenshot shows the 'Consultation Manager - [SEWCN Cardiology Referral]' window. The title bar includes 'Consultation Summary Guidelines Add List View Window Help'. The main content area is titled 'SEWCN Cardiology Referral' and 'South East Wales Cardiac Network Cardiology Referral Addendum'. A red message states: 'Please click on each section to expand, pink bars will require completion TODAY'. The interface is divided into several sections, each with a pink bar and a 'No Patient Selected' status:

- Patient Details**: Last 1 Patient Details Records, Last 1 Address Records, Last 1 Communication numbers Records.
- Reason for referral**: Includes buttons for 'All Medical History Records', 'All Heart examination Records', 'All Blood pressure Records', and 'All Medical History Records'.
- Today's Presenting Symptoms**: Includes buttons for 'Breathlessness', 'NYHA Class 1', 'NYHA Class 11', 'NYHA Class 111', 'NYHA Class 1V', 'Palpitations', 'Chest Pain', and 'Ankle Swelling'.
- Cardiac History/ Health Stats**: Includes buttons for 'Confirmed Angina', 'Previous MI', 'Cardiac Surgery/PCI', 'Heart Failure', 'Asthma', 'COPD', 'Atrial Fibrillation', and 'Previously seen cardiologist?'.

Today's Physical Signs

	+
Pulse (CVS/BP)	
Blood pressure	
Jugular Venous Pressure	

Consultation Manager - [SEWCN Cardiology Referral]

Blood pressure

Jugular Venous Pressure

Heart Sounds

All Heart examination Records - No Patient Selected.

Investigations

	+
Urea and Electrolytes	
Sodium	
Potassium	
Urea - blood	
Serum creatinine	
Full blood count	
Haemoglobin	
Thyroid function	
Free Thyroxine	
Thyroid Stimulating Hormone	
Liver Function tests	
Blood lipids	
Serum cholesterol	
Triglycerides	
Fasting glucose	
Chest X-ray	
Spirometry	

ECG- Please provide copy of ECG

Last 1 Electrocardiogram Records - No Patient Selected.

Fitness for exercise testing

Exercise Test Contraindicated Known Aortic Stenosis/ Murmur LBBB on ECG

Last 1 Medical History Records Where READ_CODE = "33BE.00" - No Patient Selected.
 Last 1 Medical History Records Where READ_CODE = "G541500" - No Patient Selected.
 Last 1 Medical History Records Where READ_CODE = "G562.00" - No Patient Selected.

Referring Doctor

Referring Doctor

All Medical History Records - No Patient Selected.
[To Print - Please use the 'Local Report Index' icon at the top of the screen and double click 'SEWCN Cardiology'](#)

Printing the SEWCN Report

Select the SEWCN Cardiology Referral Printout from the Local Guideline Index but note, there is no data entry facility - this guideline is a report which prints straight to the printer without first displaying on screen.

Read Codes to support Cardiology Referral

Provisional Diagnosis

Chest pain	R065. [D]Chest pain
Suspected Heart Failure	1J60. Suspected heart failure
Murmur (O/E murmur-heart)	24D.. O/E - cardiac murmur
Hypertension (uncontrolled BP)	2466 O/E - BP raised
Syncope symptom	1B6... Disturbance of consciousness
Palpitations	R051 [D]Palpitations

Presenting Symptoms

Breathlessness	R060D [D]Breathlessness
NYHA I	662f New York Heart Association classification - class I
NYHA II	662g New York Heart Association classification - class II
NYHA III	662h New York Heart Association classification - class III
NYHA IV	662i New York Heart Association classification - class IV
Palpitations	R051 [D]Palpitations
Chest pain	R065 [D]Chest pain
Ankle Swelling	1832 Ankle swelling

Cardiac History/ Health Stats

Confirmed Angina	G33* Angina pectoris
Previous MI	G30* Acute myocardial infarction
Cardiac Surgery/PCI	79 Heart operations
Heart Failure	G58* Heart failure
Asthma	H33* Asthma
COPD	H3 Chronic obstructive pulmonary disease
Atrial Fibrillation	G573 Atrial fibrillation and flutter
Previously seen by cardiologist	8H44 Cardiological referral

CVD Risk Factors

Hypertension	G2* Hypertensive disease
Diabetes	C10* Diabetes mellitus
Hyperlipidaemia NOS	C324 Hyperlipidaemia NOS
FH of Premature CHD	12C2. FH: Ischaemic heart dis. <60
BMI	N/A
Smoking Status	N/A
Alcohol intake	N/A

Physical Signs

Pulse (O/E Pulse Rate)	242 O/E - pulse rate
Blood Pressure	246* O/E - blood pressure reading
Heart Sounds (O/E Heart Sounds Normal)	24B1 O/E - heart sounds normal
Jugular Venous Pressure	248* O/E - venous system examined

Investigations

Urea & Electrolytes	44J..00, 44J..12, 44J5, 44JB, 44I, 4JZ
Sodium	44I5*, 44h1, 44h6
Potassium	44I4.., 44h0, 44h8

Urea-Blood	44J..11, 44J..13, 44J1, 44J2, 44J8, 44J9, 44JA
Serum Creatinine	44J3*, 44JC, 44JD, 44JF
FBC	424*
Haemoglobin	423*
TFT	442*, 44Ch
Free Thyroxine	4427, 442V, 442c
TSH	442A*, 442..12, 442K, 442L - X
LFT	44D*
Blood Lipids	44O*
Serum Cholesterol	44P*, 44OE
Triglycerides	44Q*, 44e*
Fasting glucose	44T2, 44f1, 44f2, 44g1, 44g2
Chest X-ray	535*
Spirometry	5882
ECG	32*

Other

Exercise tolerance test contraindicated	33BE Exercise tolerance test contraindicated
Aortic Stenosis	G5415 Aortic stenosis
Left bundle branch hemiblock	G562.. Left bundle branch hemiblock
